Monthly Newsletter of Corporate Relations - IIT Delhi

CSM Technologies

CSM Technologies Ltd., a Bhubaneswar-headquartered IT firm, has inked an MoU with IIT Delhi to establish an annual scholarship for a meritorious student from the economically weaker section of society.

This scholarship aims to support students who demonstrate exceptional academic potential and provide them with the financial assistance they need to succeed in their studies.

MAS Innovations

MAS Innovations (Private) Limited, is a Sri Lanka-based global apparel tech conglomerate providing concept-to-delivery solutions for the world's leading apparel brands. They have signed an agreement with IIT Delhi to collaborate on projects spearheaded by SMITA Research Lab on emerging technologies such as nanotechnology-based finishes, wearable electronic textiles, novel composite fibers, nano fibers-based products, atmospheric pressure plasma processing, functional fibers, Janus particles and biomedical products.

COLLABORATION!

A visit from Sovereign Strategy

Mr. Alan Donnelly, Executive Chairman Sovereign Strategy and Chairman, G20 Health and Development Partnership and Ms. Hatice Beton, CEO, Sovereign Strategy and Executive Director of the G20 Health and Development Partnership visited IIT Delhi. This visit was facilitated by the Corporate Relations unit of IIT Delhi on 15th February to explore collaboration opportunities. The delegation visited IITD-AIA Foundation For Smart Manufacturing Centre of Excellence and a couple of start ups in the Research and Innovation Park. The visit emphasized their commitment to support academic research and bridge the gap between research and industry applications.

United Nations Industrial Development Organisation (UNIDO)

UNIDO, a specialized agency in the United Nations system with a unique mandate to promote and accelerate sustainable industrial development, signed an agreement with Prof. Agam Gupta, Department of Management Studies, on "Visualization of data" collected under UNIDO's National Manufacturing Innovation Survey (NMIS).

Volvo Energy

Volvo Energy, the Volvo Group's newest business area represented by Mr. Daniel Troedsson, Head of Battery Optimization and Monitoring - Technology, and Mr. Malay Jana, Head of Global Battery Expert visited Indian Institute of Technology, Delhi. This visit was primarily to understand and discuss research in the areas of Battery and Sustainability with Prof. Amit Gupta and his team from the Department of Mechanical Engineering. The team also interacted with faculty members of The Centre of Automotive Research and Tribology (CART).
