Professor, Department of Energy Science & Engineering

Date: 25th July, 2022

Dear Student,

Congratulations on being selected to IIT Delhi. Only a small percentage of those who apply get selected based on their academic record and performance. At our Institute you will have the opportunity to develop your disciplinary skills and specialize as well as have the opportunity for all round growth. You will have the opportunity to use the cutting-edge characterization and fabrication facilities or the high speed computing and the library and online resources. You will have the benefit of interacting with bright researchers, students, faculty and explore your interests. We have a picturesque campus and excellent sports facilities and cultural and extracurricular activities.

We hope you will utilize the Institute facilities and benefit from your time at the Institute. In a research degree we hope you will set your goals high and make contributions in terms of papers, patents, ideas and prototypes. We encourage our students to innovate and take their ideas forward to create an impact in the real world.

We hope you will form strong friendships with your batchmates and seniors. Please do not hesitate to reach out for help for assistance. Student mentors, counsellors, faculty advisors, programme counsellors all are there to help you settle in and make the best of your stay.

On behalf of the entire student affairs and academics team. I welcome you to IIT Delhi and hope you have a memorable and enjoyable stay at the Institute.

With Best Wishes,

(Rangan Banerjee)
