IIT Delhi's  
Centre for Biomedical  
Engineering

---

# Welcome

## About us

CBME was established in 1971 as a Joint venture of IIT Delhi and AIIMS, Delhi. The Centre has applied engineering principles to address medical and biological problems. Over the years CBME has become the premier biomedical centre of the country.

It has faculty from diverse backgrounds who are actively engaged in various interdisciplinary research activities including disease prevention, diagnosis, and treatment, rehabilitation and injury mechanics, biomaterials, biomedical device development, Finite Element Modeling (FEM), **data driven modelling**, and Disease/Recovery Predictions using **Machine Learning** and **Deep Learning**.

## Programs Offered

- M.Tech in Biomedical Engineering
- Doctorate (PhD)

## Admission Criteria

- Students with a top ranks in GATE or any equivalent national examinations are shortlisted followed by an interview.
- Two-stage rigorous selection process ensures that only the best and the brightest make it to the department.

---

# Head of the Centre

---

## Prof. Naresh Bhatnagar

Head, Centre for Biomedical Engineering, IIT Delhi.

[hodcbme@admin.iitd.ac.in](mailto:hodcbme@admin.iitd.ac.in)

Office Address: Block 3, 299, IIT Delhi, Hauz Khas, New Delhi – 110016;  
Phone: +91-11-2659-6396; 6312

# Domains

Medical  
Imaging

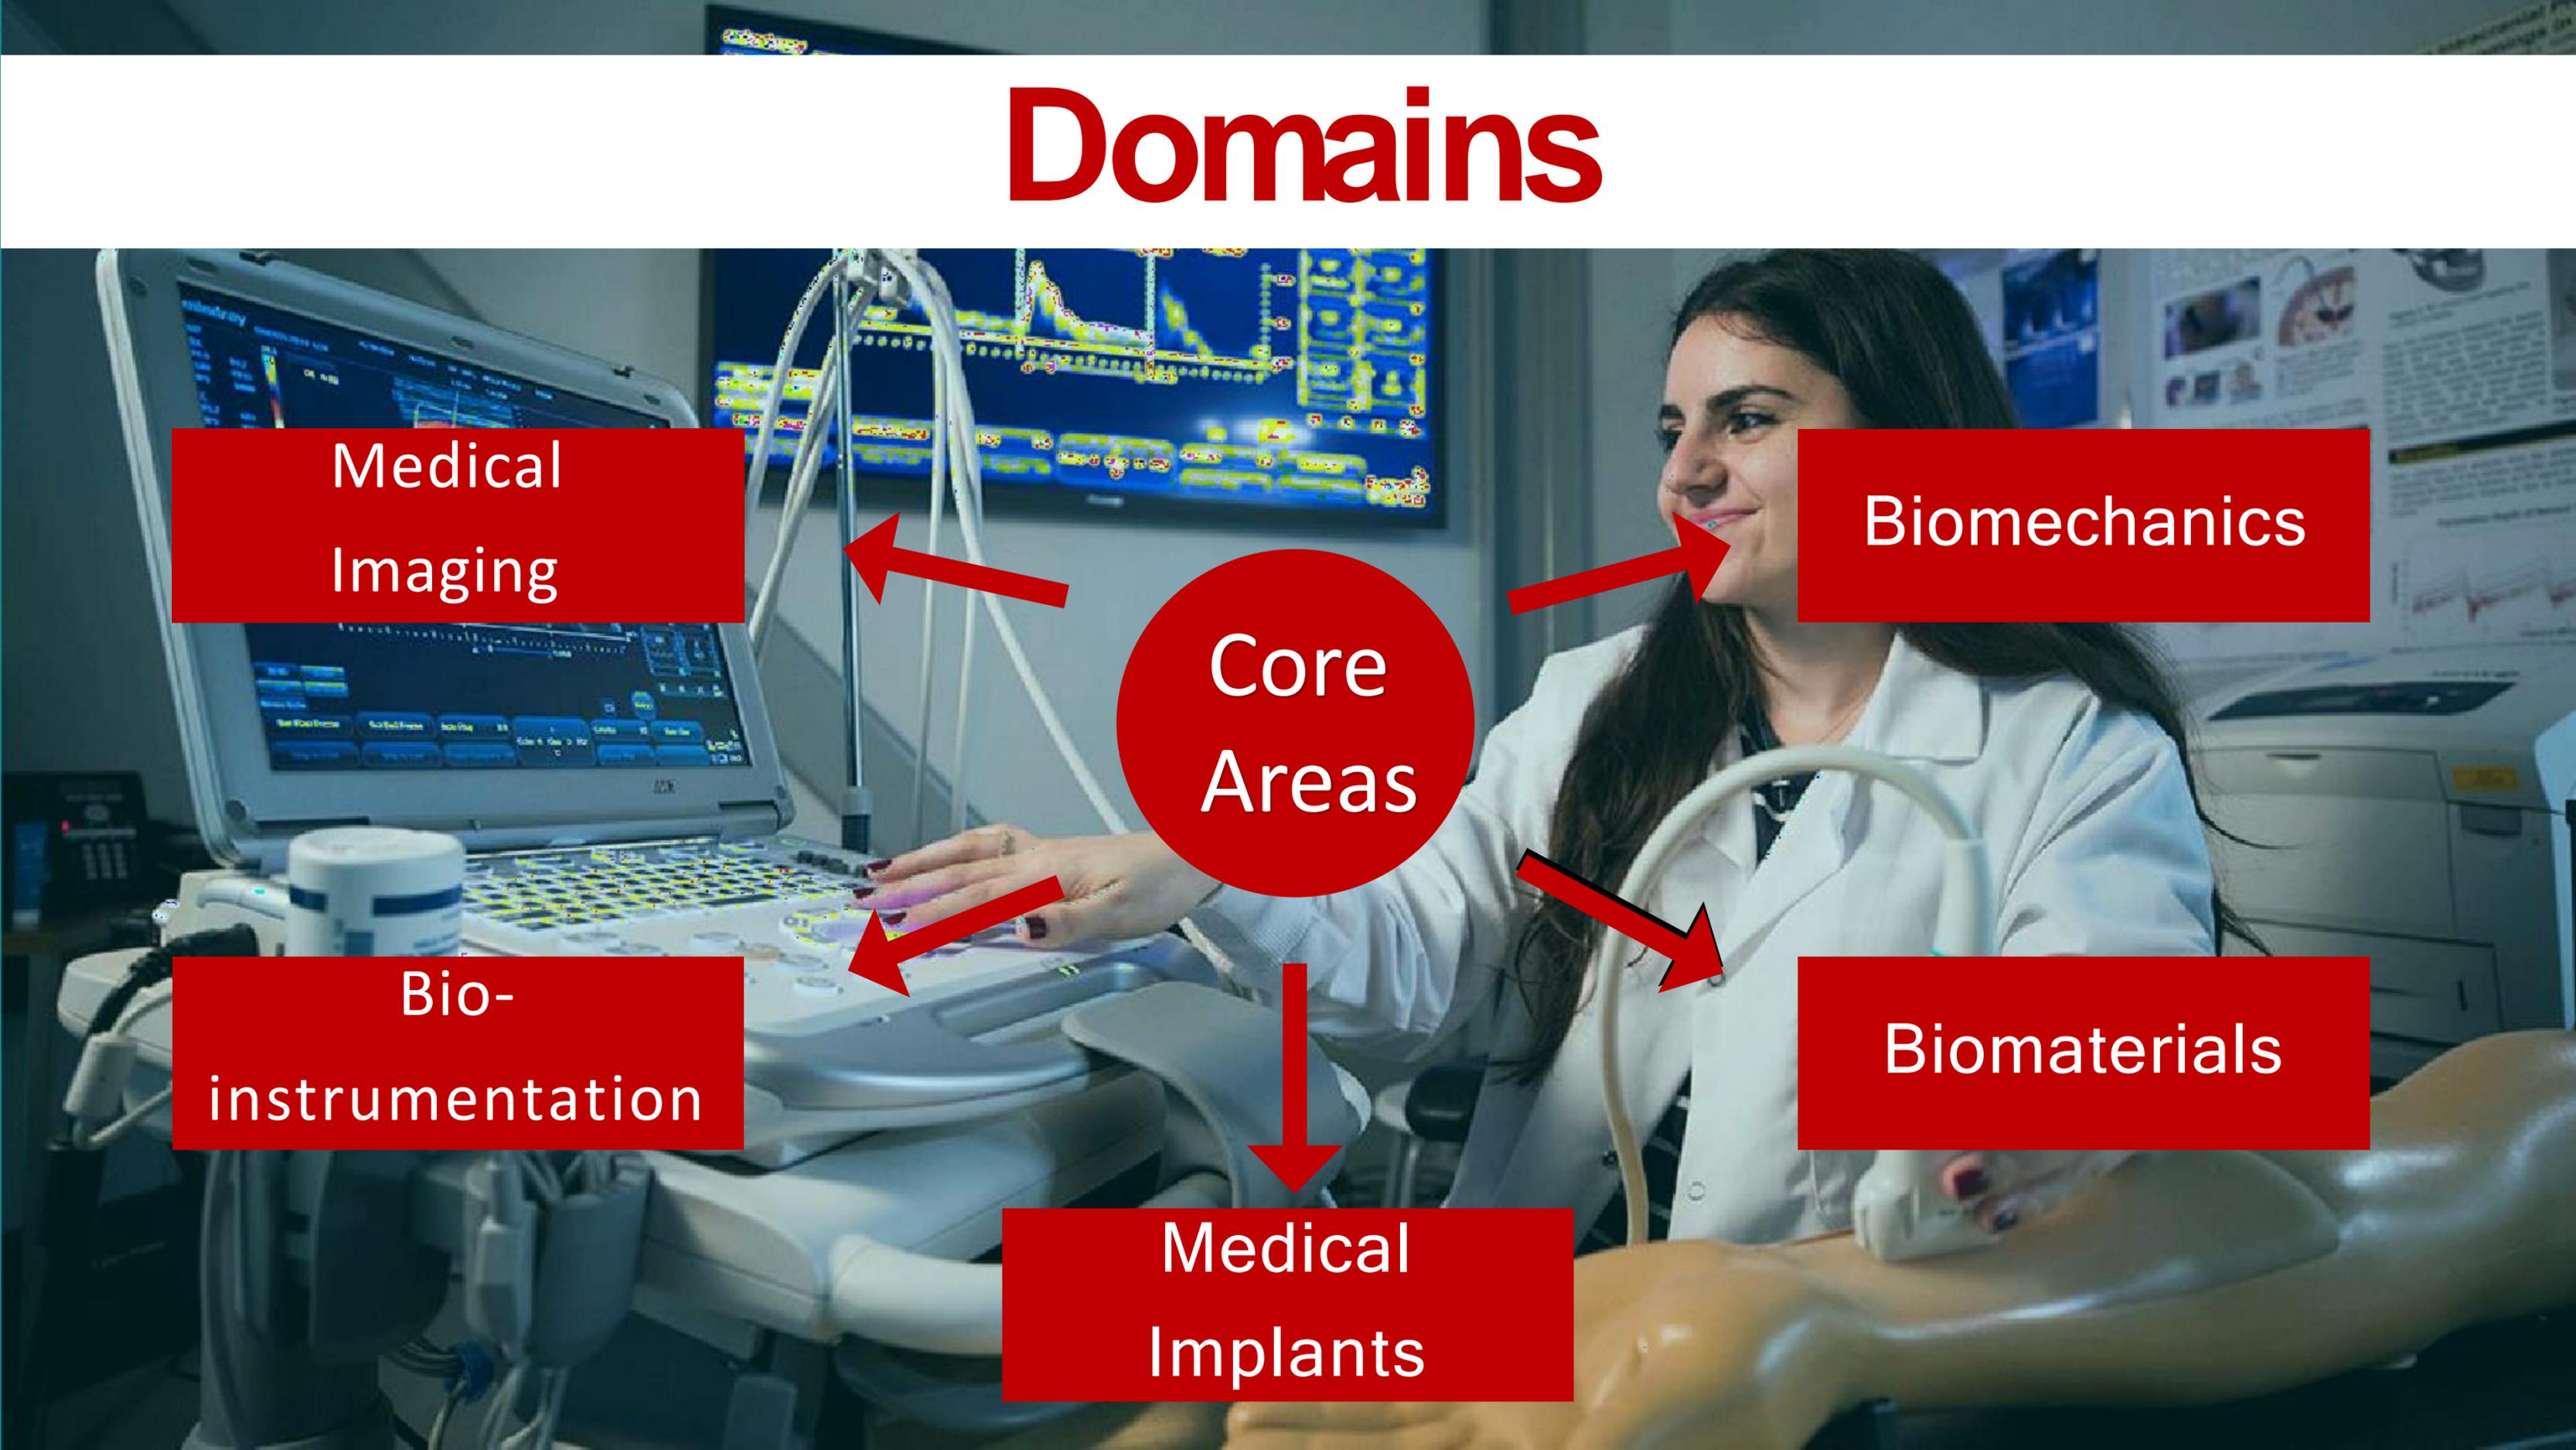

Biomechanics

Core  
Areas

Bio-  
instrumentation

Biomaterials

Medical  
Implants

# Academics

- M.Tech programme in Biomedical Engineering is designed for students from both engineering and science disciplines to give training in frontier areas for solving the longstanding problems of healthcare using including but not limited to applications of Data-driven approaches, Machine Learning, Deep Learning, 3D Modelling.

## Courses students have taken:

Biomedical Data Analysis

Introduction to Machine Learning

Deep Learning for Medical Image Analysis

Biomedical Instrumentation

Biomedical Ethics

Basic Electronics

Fundamentals of Biomechanics

Neuromechanics

Probability and Statistics

Biomedical Signal & Image Processing

Finite Element Modeling of disease

Point of Care Medical Diagnostic Devices

Industrial Biomaterial Technology

Research Techniques of BME (Signal processing)

Wearable Technologies

# Recent Research Projects in CBME

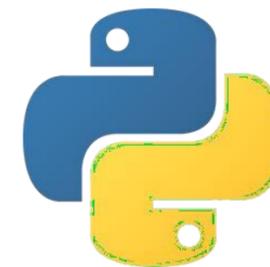

- Machine Learning application in Medical Image Processing
- Transfer Learning based Breast cancer classification using ResNet
- UNET based deep learning architecture for cardiac segmentation
- LSTM based machine learning Classification of Biomedical signals
- 3D printing techniques for Fabrication of silicone simulants
- CAD modelling of molds for Eye and skin simulants
- Proprioceptive devices using machine learning
- Wash-free cancer detection using CA 19-9 as target
- Decoding and Preempting Object Slippage from spatiotemporal cutaneous Vibration Patterns
- Detection and Characterization of Breast Tumors using Contrast Enhanced Mammography

# Research Facilities: A Glimpse

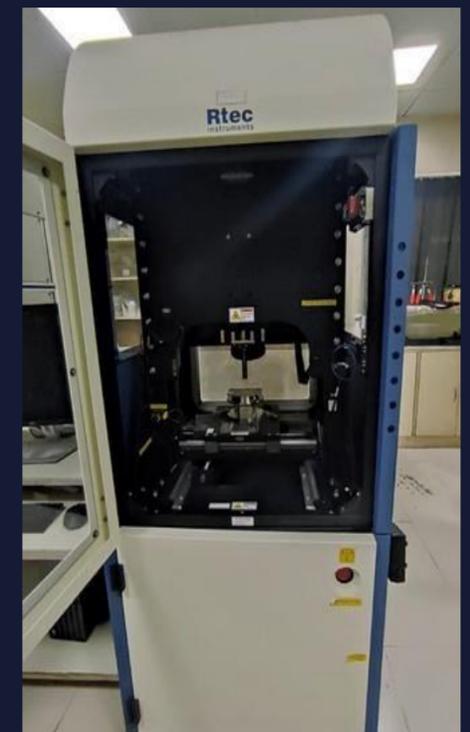

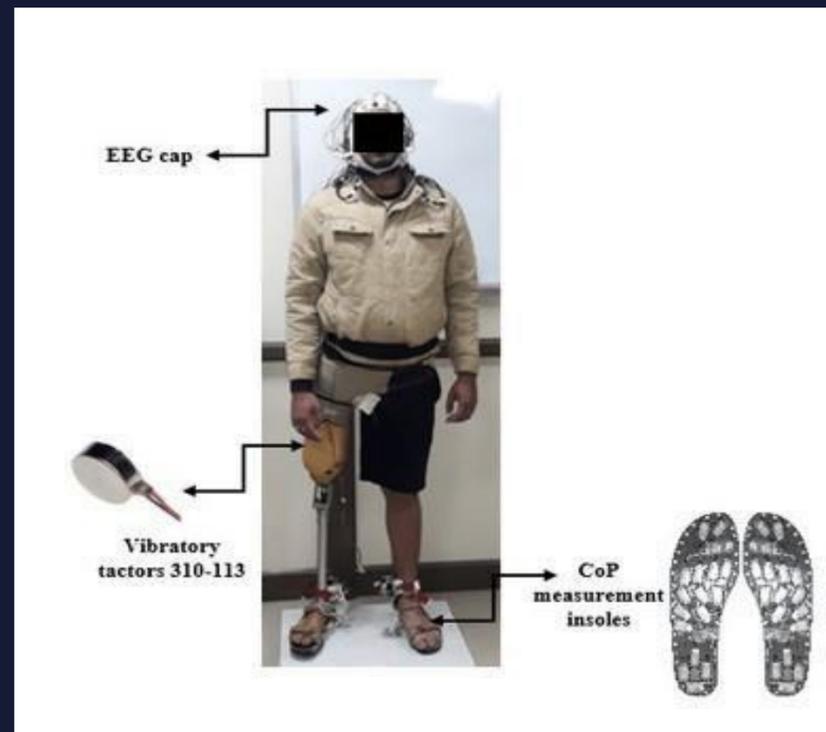

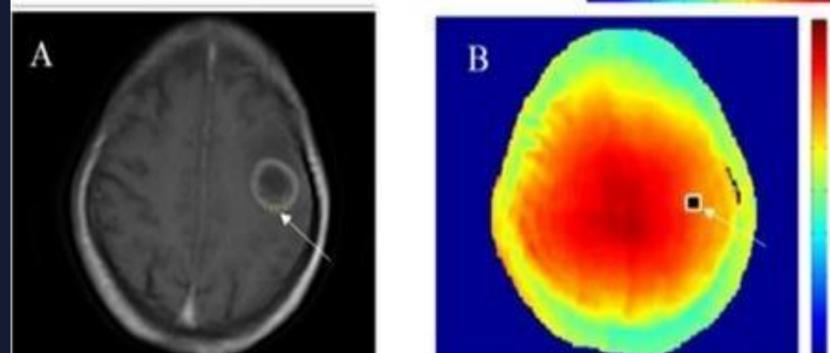

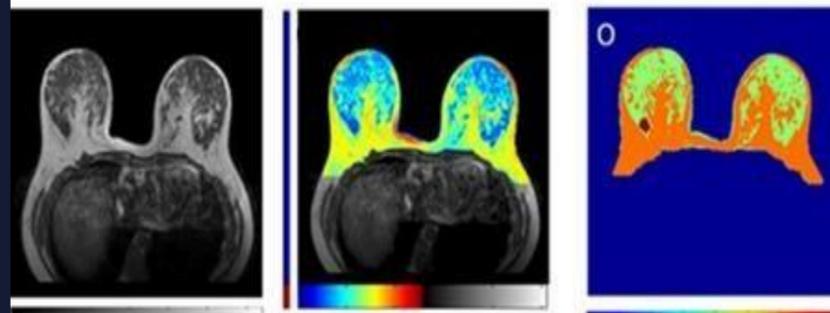

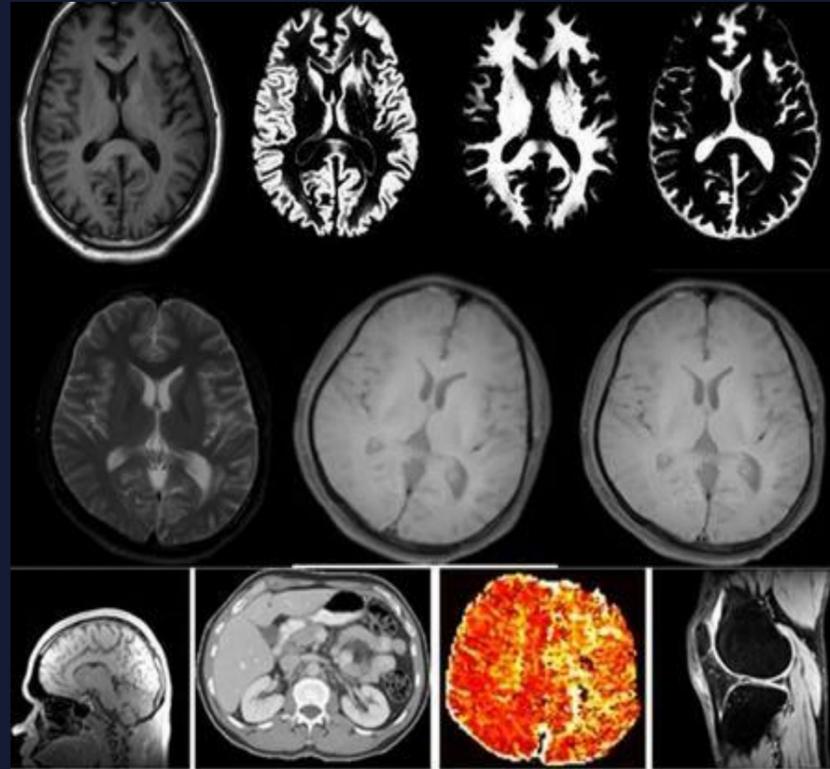

# Softwares

that Students are familiar with and using extensively.

# Research Gallery

# Collaborations

## Government Organizations

शरीरमाद्यं खलु धर्मसाधनम्

आरोग्यम् सुखसम्पदा

National Institute of Immunology  
राष्ट्रीय प्रतिरक्षाविज्ञान संस्थान

## Academic Organizations

JOHNS HOPKINS  
UNIVERSITY

# Previous year Students Placed at

Please visit website of the Office of Career Services (<https://ocs.iitd.ac.in>)  
for information regarding recruitment process and more.
