2022-23

---

IIT Delhi's  
Centre for Biomedical  
Engineering

---

# Welcome

## About us

CBME was established in 1971 as a Joint venture of IIT Delhi and AIIMS, Delhi. The Centre has applied engineering principles to address medical and biological problems. Over the years CBME has become the premier biomedical centre of the country.

It has faculty from diverse backgrounds who are actively engaged in various interdisciplinary research activities including disease prevention, diagnosis, and treatment, rehabilitation and injury mechanics, biomaterials, biomedical device development, Finite Element Modeling (FEM), **data driven modelling**, and Disease/Recovery Predictions using **Machine Learning** and **Deep Learning**.

## Programs Offered

- M.Tech in Biomedical Engineering
- Doctorate (PhD)

## Admission Criteria

- Students with a top ranks in GATE or any equivalent national examinations are shortlisted followed by an interview.
- Two-stage rigorous selection process ensures that only the best and the brightest make it to the department.

---

# Head of the Centre

---

## Prof. Naresh Bhatnagar

Head, Centre for Biomedical Engineering, IIT Delhi.

[hodcbme@admin.iitd.ac.in](mailto:hodcbme@admin.iitd.ac.in)

Office Address: Block 3, 299, IIT Delhi, Hauz Khas, New Delhi – 110016;  
Phone: +91-11-2659-6396; 6312

# Domains

Medical  
Imaging

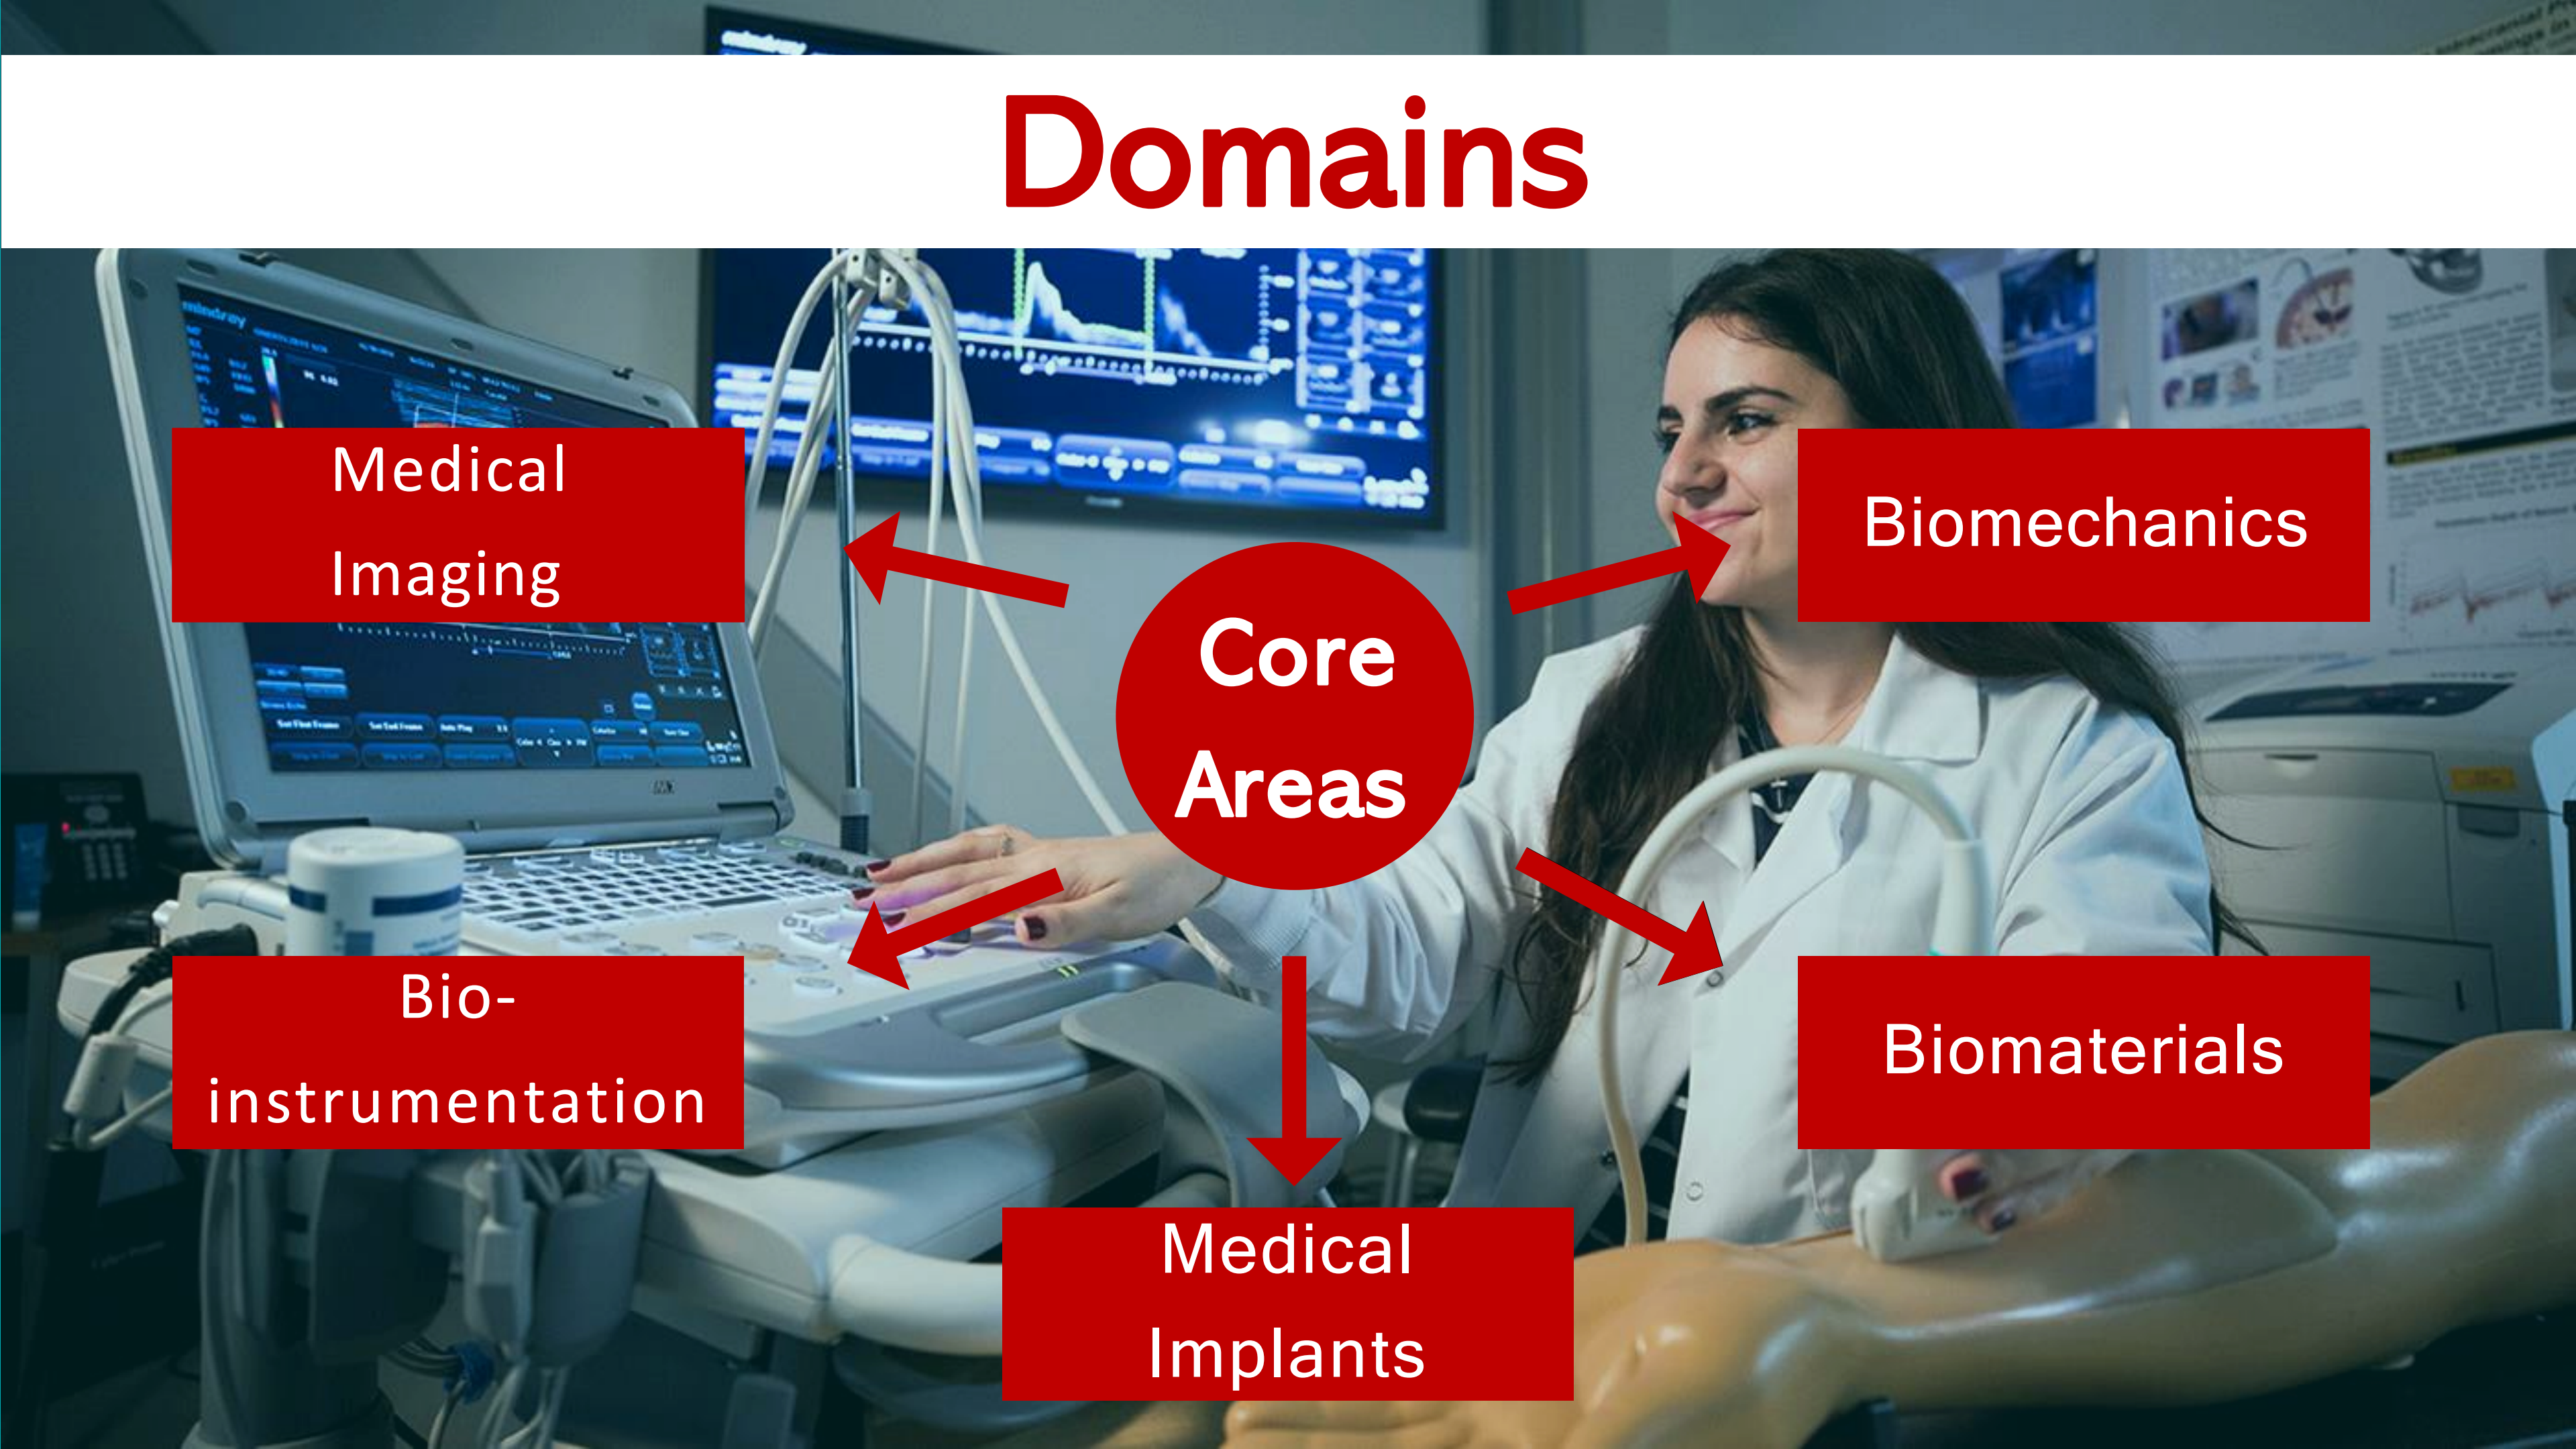

Biomechanics

Core  
Areas

Bio-  
instrumentation

Biomaterials

Medical  
Implants

# Academics

- M.Tech programme in Biomedical Engineering is designed for students from both engineering and science disciplines to give training in frontier areas for solving the longstanding problems of healthcare using including but not limited to applications of Data-driven approaches, Machine Learning, Deep Learning, 3D Modelling.

## Courses Students Have Taken

Biomedical Data Analysis

Biomedical Signal & Image Processing

Biomedical Instrumentation

Wearable Technologies

BioInstrumentation

Basic Electronics

Fundamentals of Biomechanics

Neuromechanics

Introduction to Machine Learning

Probability and Statistics

Deep Learning for Mechanics

Finite Element Modeling of disease

Point of Care Medical Diagnostic Devices

Industrial Biomaterial Technology

Research Techniques of BME (Signal processing)

# Recent Research Projects in CBME

- Applications of Machine Learning in Medical Image Processing
- Applications of Machine Learning in Biomedical Signal Processing.
- Medical Image/Signal Processing and Data Analysis
- Methodology for Quantitative CEST-MRI Quantitative software tools to detect mass lesion
- Development of elbow prosthesis
- Proprioceptive devices using machine learning Mathematical modelling of Disease
- Applications of nanofabrication technologies and nanoscale devices
- Development of biodegradable copolymers from renewable resources
- Development and modifications of Biomaterial for improved performance
- Development of new functional nanomaterials.

# Research Facilities: A Glimpse

# Ongoing M.Tech Thesis Projects

- Medical Image Processing and Data Analysis Including applications of Artificial Intelligence.
- Finite Element Modeling of Disease.
- Medical Image Processing and Analysis for Clinical Translation .
- Development of Mathematical model/algorithm that could allow early detection of acute liver failure.
- Wearable Immunosensor for sweat biomarker monitoring.
- Self Adhesive Immunomodulatory Injectable Cardiac patch for the treatment of Myocardial Infarction.

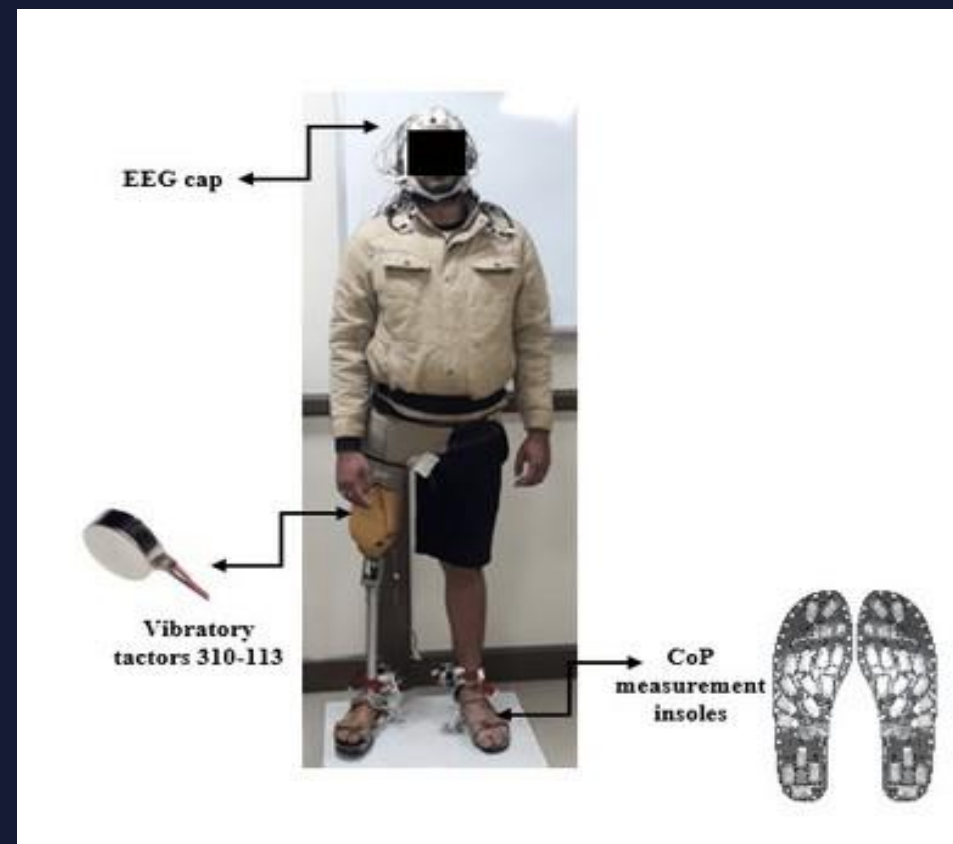

# Softwares

that Students are familiar with and using extensively.

# Research Gallery

# Collaborations

## Government Organizations

शरीरमाद्यं खलु धर्मसाधनम्

आरोग्यम् सुखसम्पदा

National Institute of Immunology  
राष्ट्रीय प्रतिरक्षाविज्ञान संस्थान

## Academic Organizations

JOHNS HOPKINS  
UNIVERSITY

Ulster  
University

# Previous year Students Placed at

Please visit website of the Office of Career Services (<https://ocs.iitd.ac.in>)  
for information regarding recruitment process and more.
