The background of the slide features abstract, overlapping green geometric shapes, primarily triangles and polygons, in various shades of green, creating a modern and dynamic visual effect.

**Survey Results
for
Resumption of In-person (offline classes)
Faculty and Student Survey - February 2022**

Faculty Survey: For other than UG First Year courses

Resumption of in-person classes

Total Respondents = 360

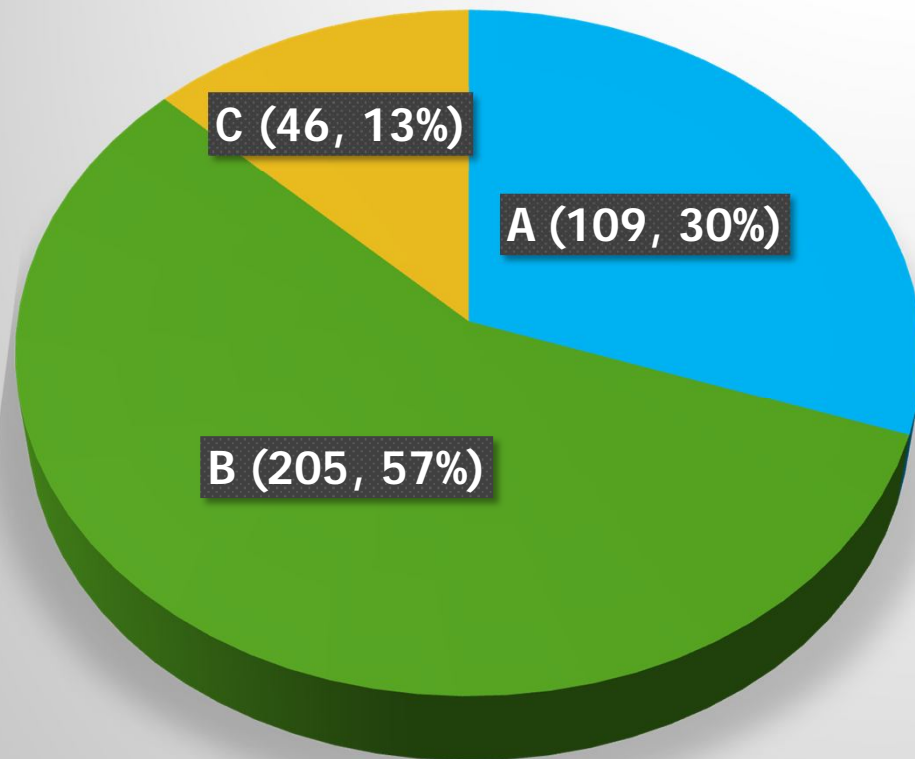

- (A) **From March 2** - (or appropriate date soon after) - subsequently all classes and evaluations are to be held in person.
- (B) **From March 14** - subsequently all classes and evaluations are to be held in person.
- (C) **From March 14 - Continue teaching for this semester online, only evaluations to be held in person.** Lab semester in person (for students in pending labs), starting on April 25. Full strength comes back in July.
- (D) **Continue this semester online, evaluations are also held online.** Lab semester in person (for students in pending labs), starting on April 25. Full strength comes back in July.
- (E) **Any other option**

Faculty Survey: UG First Year Courses

Resumption of in-person classes

Total Respondents = 360

(A) From March 2 - (or appropriate date soon after) – Sem. I continues online, only major is in person.

(B) From March 24 – (Sem. I major exams continue online as announced previously) - subsequently Sem. II, 2021-22 is in person.

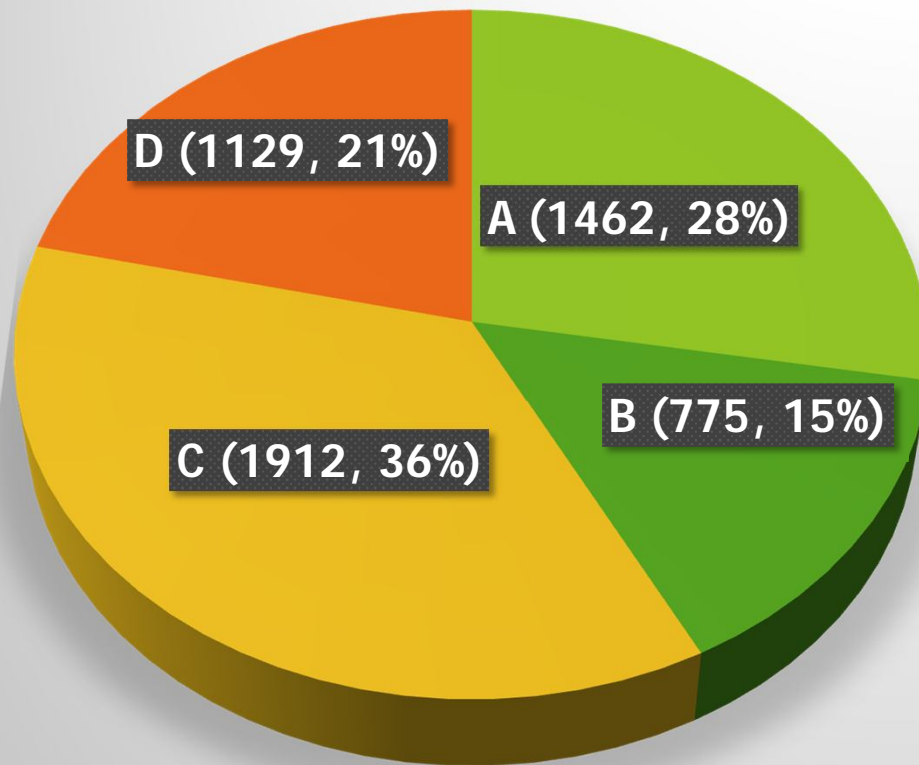

(C) Any other option

Student Survey: Other than UG First Year Courses

(survey run amongst students other than UG FY)

Resumption of in-person classes

Total Respondents = 5278

(A) From March 2 - (or appropriate date soon after) – subsequently all classes and evaluations to be held in person.

(B) From March 14 - subsequently all classes and evaluations to be held in person.

(C) From March 14 - Continue teaching for this semester online, only evaluations post March 14 (including Major) to be held in person.

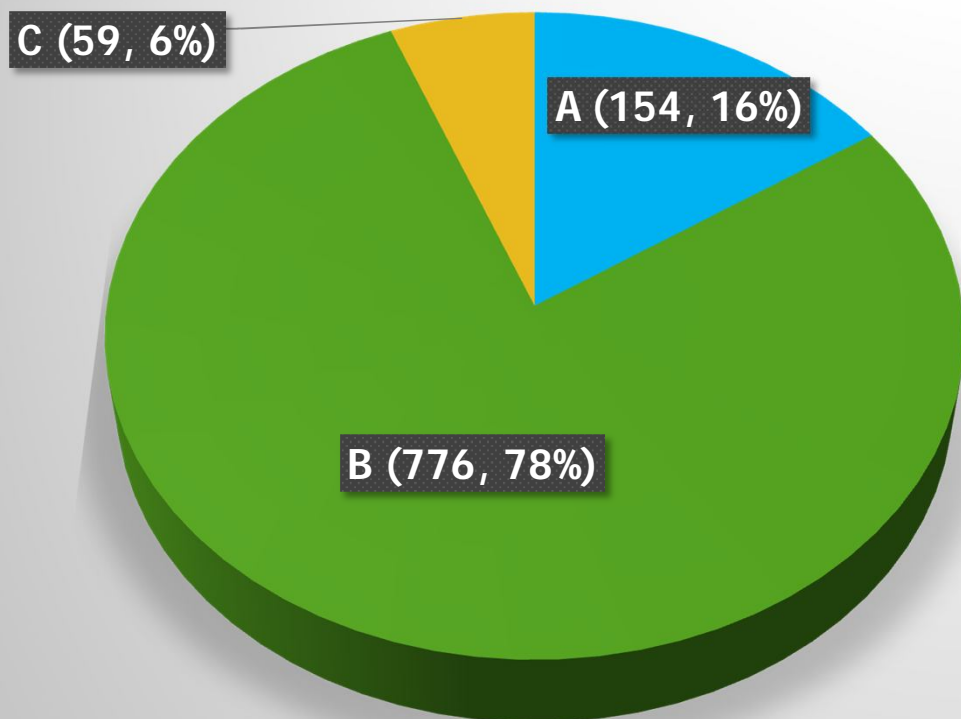

(D) Any other option

Student Survey: UG First Year Courses

(survey run amongst UG FY students)

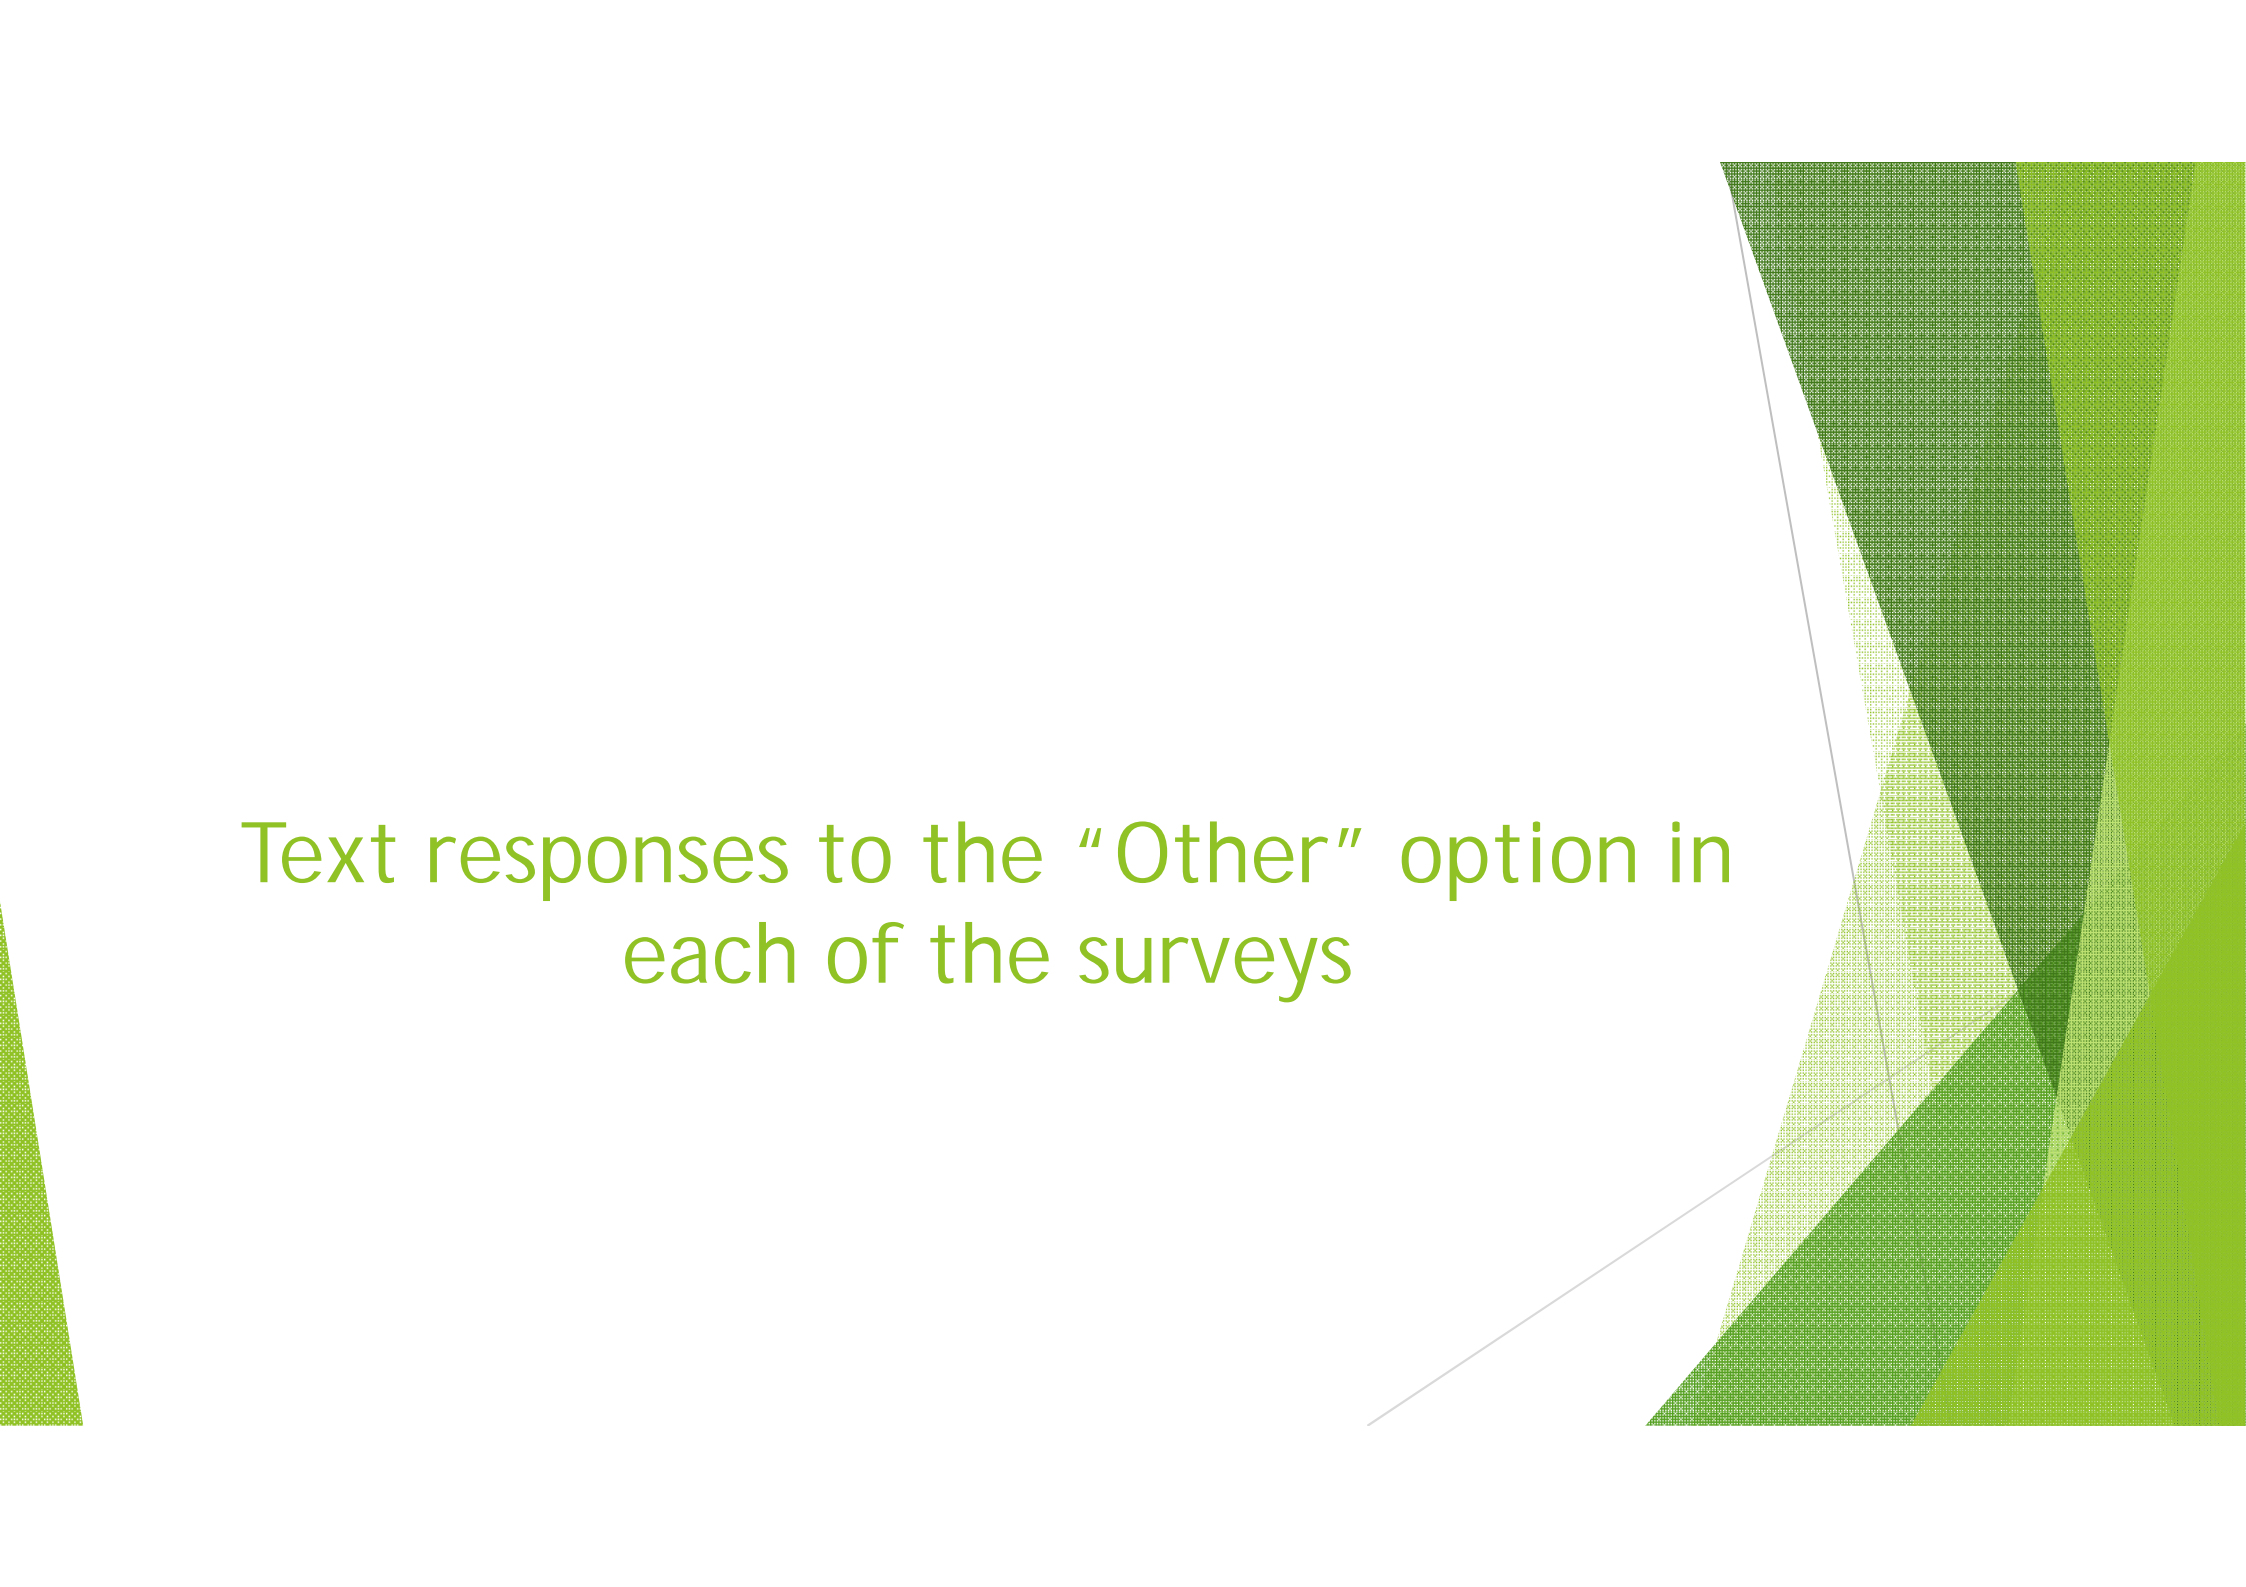

Resumption of in-person classes

Total Respondents = 989

- (A) From March 2 - (or appropriate date soon after).
- (B) From March 24 – Start Sem. II, 2021-22 (UG First Year) in person.
- (C) Any other option

Text responses to the “Other” option in
each of the surveys

The background of the slide features abstract, overlapping geometric shapes in various shades of green, ranging from light lime to dark forest green. These shapes are primarily located on the right side and bottom of the slide, creating a modern, layered effect. A thin, light gray line also extends from the bottom right towards the center of the slide.

S.No.	Remarks in other option given by Faculty for Other than UG First year courses
1	Hostels occupied in stages and number of cases monitored. Only when hostels have been occupied, in person classes should begin. Students coming in contact of 5s from outside the campus are more likely to spread infection.
2	Option 4 ; This opinion are aired with the assumption that, come July 2022, we WILL return to a single unified academic calendar. Those of us who have been teaching BOTH UGFY as well as NonUGFY have been teaching WITHOUT a break for almost two years now. Can't speak for the 5s but its driven me crazy. :)
3	Start offline classes from August 2022. Presentations, interviews and viva can continue online forever since it saves a lot of time for faculty members.
4	Feedback from the students is more important in this regard. Personally I would prefer the first option, That is March 2.
5	TheContinue the semester online, and major evaluation online.
6	Classes and evaluation of non-project courses can continue online. Those students engaged in projects can be asked to move to campus, such as 4th year BTechs doing BTPs, and 2nd year MTechs doing their thesis
7	From March 14, courses with less than 50 students to start in-person classes; for 5 courses (with more than 50 students) classes to continue in online mode. Evaluations for all courses to be held in person.
8	Continue semester online, End semester exam can be offline or dual mode. Students who are having pending labs should be brought on board and labs should start from early march. Lab semester held during december was too hectic and a strain to faculty, staff and students. If we start labs as early as possible then summer vacation will not be affected and the planned lab semester can be made shorter. Labs can be conducted in a normal relaxed manner
9	Not just for this semester. Make the choice of online teaching and online exam a choice which is always available. It will save time , promote MOOCs and reduce the pressure to create physical infrastructure.
10	for M.Tech option (c) for B.Tech option (a)
11	Continue the whole semester online let the exams also be completely online in order avoid discrepancies related to hybrid mode.
12	we should wait and watch upto 31st march to observe the Covid situation
13	For offline teaching, We shall plan to accommodate students with 50% capacity by various means , especially all large classes above 30-40, by staggering , increasing LHC timings and maybe giving options for small classes in committee rooms /online as per coordinator discretion.

S.No.	Remarks in other option given by Faculty for UG First year courses
1	Continue this semester online
2	Same response as the above question.
3	I do not teach to UG first year.
4	NA
5	
6	No opinion
7	Not teaching First Year
8	Offline classes from next semester.
9	I am not teaching UG First year courses, therefore would not be in a position to justify a suitable answer
10	No comments
11	In-person classes (please do not call these classes off-line classes) for first year students should only start in July. I am proposing this because I am in favour of in-person classes for non-UGFY students to start from July. Also, the Institute needs to work on classrooms to improve ventilation before classes start. This is a massive exercise, if taken up. It is hard to make sure that students wear good quality N95 masks to protect themselves, but well ventilated classrooms can give a level of protection to the most unconcerned student
12	No suggestion
13	Na
14	Option 2 is fine with me except for the lab session. Lab sessions should be modified duly (e.g., twice daily with reduced capacity) in order to assure social distancing.
15	Vaccination must be mandatory and then option 2
16	Continue the first year study in the online mode. Students may be called back on campus during their second year study.
17	Sem II, 2021-22 should also be completely online considering large class sizes and inadequate ventilation in lecture halls
18	
19	No comments. Haven't taught UG first year courses.
20	Not teaching first year students
21	Start Physical classes from July
22	i am not teaching UG 1st year course
23	
24	Semester I, 2021-22 should be entirely online including major exam, since it will difficult to conduct major exam in Feb with such a short notice.
25	We (HuSS Dept) do not have UG students. Can not comment.
26	Classes online and evaluation in person. The labs can also be conducted in person after March 24
27	
28	From March 24, if it is possible to hold classes in person in a socially distanced manner with such a large class size
29	No comments since I do not teach UG Courses
30	I am not teaching UG first year
31	No comments
32	Major exams should be held in person if possible. Classes can continue to be online for
33	uniformity of Sem I and Sem II may be considered.
34	NA
35	No comments
36	No opinion

37	First year teaching can be continued to be done in an online mode and they can be asked to onboard in the campus at the start of May so that by that time most of the non-FY students who are done with their majors can leave the campus. In case make up labs are being carried out for the non-FY students, then the UG FY students should be allowed to onboard after their minor (after May 11). This way we can avoid having too many people on campus at the same time.
38	Na
39	No comment
40	Same as above. It is utmost important that stage-wise procedure is followed to maintain safety of those inside the campus
41	Option 2 ; This opinion are aired with the assumption that, come July 2022, we WILL return to a single unified academic calendar. Those of us who have been teaching BOTH UGFY as well as NonUGFY have been teaching WITHOUT a break for almost two years now. Can't speak for the 5s but its driven me crazy. :)
42	Start offline classes from August 2022, when covid norms such as mandatory wearing of masks are lifted.
43	Feedback from the students is more important in this regard. Personally I would prefer the first option, That is March 2.
44	Start online from next semester
45	Make onboarding optional for students EVEN for Semester II if the course structure allows it. Have instead a couple of dedicated Lab "months", these are staggered in time to allow 33% students at a time, thrice in each semester.
46	We should wait and watch upto 31st march

S.No.	Remarks in other option given by students (other than UG FY) for Other than UG First Year Course
1	- Continue teaching for this semester online, as well as the evaluations online
2	1. It is recommended that atleast this semester be continued online including Evaluations. The reason for this is due to the challenge (administrative) of shifting with family while classes being run simultaneously. Also as barely one month will be left for the Major examinations, so it will be disastrous indulging in making administrative arrangements and not focussing on studies during this
3	10 days after minor should be kept as minor break for onboarding and all other stuffs and then resumption of offline classes from 1st March
4	2 audit as earlier with evaluation offline
5	20 April: since cases can rise again and the sem has almost passed
6	20 March - Offline classes
7	20 march including online as well as offline as convenient to student as well as faculty
8	20 march online class with offline evaluation of majors
9	2nd semester for MTech students should be held online. From 3rd semester it should start in offline
10	Accommodation for us (CEC Students) have not been decided/provided yet. Since the hostels are not provided, coming to Delhi from West Bengal to appear only for Major & return seems practically infeasible and exhausting. So as per my opinion, this semester be let to commence as it is now, ie, Online teaching and online evaluations (including Major) and physical semester be considered from
11	According my opinion continuing this semester completely online is better because now for a small duration students need to come to college and then have to leave for the summer break if they are not
12	According to me all the classes and evaluations to be held in online as well as offline. This should be optional so that student can opt any one of the option according to their convenient. For handling of Sudden mass crowd at the LHC as well as hostel may be explosive.
13	According to my opinion whole semester including exam should be held in online mode.
14	After April
15	After Holi classes can run in-person mode. But exam for this semester should be online mode
16	After major
17	After major evaluation, due to accommodation issues
18	After major exam the resumption of offline teaching and evaluation is good. If resumption is done before major, it will affect the preparation of major exam adversely.
19	after major examination for in class practicals
20	After Major examination for our lab semester
21	After major it would be better to be attend classes in person.
22	After majors , let this sem be online
23	After majors for lab semester
24	After majors for lab semester - because now in the middle of the semester it will create panic among
25	After Majors New semester should be held Offline. This semester online..
26	After majors: It is difficult for many students to adjust to hostel life this quickly. I don't even know 10 people of my branch. I think it is best to give some free time to adjust to hostel life. It won't be possible if you resume offline just before majors. Performance in majors of such students will also be affected.
27	after semester 2021-22
28	After Semester II, 2021-2022
29	After the completion of this semester. The courses along with the research work is quite engaging. It will be very difficult to adjust in between the semester. It would be really convenient and important for
30	After the end of this semester (MAJOR EXAMS), classes and laboratories should be held in person.
31	After the semester ends
32	after this semester
33	After this semester. This semester is short (3 months only) and coming in last month will disturb our academics as 2-3 weeks will be wasted in onboarding.
34	All classes and evaluation online
35	All classes and evaluation to be held in person post this semester
36	All classes and evaluations process to be held in person after majors because our current semester is
37	All classes and evaluations to be held online
38	All classes and evaluations(including major) to be held online
39	All offline activities including classes and exams should resume only if students are provided with

40	All online
41	All safety protocols have to be taken so time will be taken for staggered on boarding. Plus many students live far away they have to plan. And not much time is left in the semester so either the entire semester can be online or majors plus lab sem can be offline so that students can come for majors and
42	All teaching and evaluation activities to be held online for the ongoing semester.
43	All teaching and evaluation should be conducted online
44	All the classes and evaluation should be online for this semester.
45	All the classes and evaluation to be held online mode only for final year students because final year students stay only one month in Delhi as per academic calendar. For only one month room searching cost and shifting cost is very highly and very difficulty and After one month all many of the students back to home city or other city. As I think 4000 room charges + 3000 food cost + 3000 other charges + approximately 3000 shifting cost from Jaipur to Delhi and after 11 April shifting Delhi to Jaipur Total-
46	All this sem should be online as only one month left..
47	Almost every academic institutions have started there classes offline ...our classes should start at
48	Almost half of the semester is over and the mode is online yet, making it offline suddenly may create some problems for Mtech students as they won't be provided with hostels. So its a sincere request to carry atleast this semester online itself that is classes and evaluation and do the onboarding from next
49	Already half sem has been online it is not much of a use to keep just last few classes offline. It is better if we can finish this semester online
50	Also provide us hostel onboarding
51	Any date is fine if we get some relaxation work from IITD in terms of academics so we can travel without any loss. Delay of single day in this semester is causing too much backlog. So i request you to give 3-4 day off in which student can travel without loss of academic work. We have deadlines almost
52	Any one will to if hostel provided not feeling safe outside campus
53	Any option is suitable provided hostel room is allotted to new students like me, so as to avoid the inconvenience of looking for off-campus accommodation just a month before exams.
54	Anyday only if hostels are allotted.
55	April, after major exams
56	As evaluation is going to be held in person so teaching should also be done in person as soon as possible and no online classes should held till then.
57	As half the semester is done in online mode, then students must have already been used to online
58	As i am an international student from Afghanistan, and haven't received my visa yet. I want this semester to be fully online. If I received my visa , I am happy with any option above.
59	As I am from CEC batch and only one month is left and we are not getting accommodation in hostel so there will be problem to search accommodation only for one month so classes and exams should be
60	As in a very short notice it will be very much hard to arrange accommodation as we are not still given
61	As it will take 2-3 weeks for settlement , it is proposed that this semester maybe concluded in online mode. Further, it is proposed that next semester onwards may be conducted offline.
62	As mentioned in academic calendar that Lab class will held from 24/04/22 , so I think it will be more convenient that continue teaching for this semester online along with MAJOR .
63	As most of the semester has gone through online mode. It should be in online mode and exam also online.it will be difficult to arrange everything for short period of time
64	As only one month will be left and the college is also not providing us hostels, i think online semester will be good. For one month it will be very difficult to find accommodation and attend offline classes at
65	As per my views Full semester should be in online mode
66	As per now semester is going in online, I am settled with that process for atleast this semester because it is difficult to move on from home to delhi and find room their inbetween this semester.
67	As soon early as possible. Live in-person classes may be recorded for the ones who can't make to
68	As the classes are being held in online mode and mtech students won't be getting hostel so to be there only for the exam days would be problem for many students. As things stand i think this semester should conclude in online mode. From the next semester the offline classes and evaluation
69	As the classes are being held in online mode and mtech students won't be getting hostel so to be there only for the exam days would be a problem for many students. As things stand i think this semester should conclude in online mode. From the next semester the offline classes and evaluation

70	As the classes are being held in Online Mode and Mtech students won't be getting hostel so to be there only for the exam days would be problem for many students. As things stand i think this semester should conclude in online mode. From the next semester the offline classes and evaluation
71	As the classes are held are held online till now So suddenly shifting to Delhi would be a problem for MTech students as hostels wont be made available to us. It is also requested that audit policy does not change .It would be good if classes and evaluation are both held in online mode for this semester
72	As the onboarding process would almost take up 3 days for us (one day for preparation of all things and one day travelling and then one day at campus to setup the rooms as they would be all messy), I don not feel switching modes between semester is a good move. Personally I have fixed 2 quizzes every week along with other deadlines and quizzes along with it. After minors I already have 5-6 things lined up in around 10-12 days So it would make the onboarding process lot more difficult. I would
73	As the semester will almost be about to end, it might be better to just finish this semester online giving enough time to everyone for the next sem completely offline.
74	As there are no hostels available for MBA(Post-Grad) boys, we would like the management to consider continuing teaching and evaluation(including major) for this semester online.
75	As there is only one and half month left for this semester, please continue the online mode for both classes as well as evaluations. We have vacated hostels and now it will be problematic for us to move back to hostel especially for those who are from long distances.
76	As this is our last semester so it will be better if everything goes online in this semester.
77	As this semester has already been conducted online so far. So it would be better to keep this online and make classes offline from next semester onwards. Thankyou.
78	as this semester is half completed by april starting this semester will be completed. so iam felling that freshly starting of classes from next semester would be fine. thank you.
79	As we are m.sc 2020 batch students and never came to campus and this is our last semester and coming this movement at campus is difficult for us and to adjust in different environment in such short time is difficult I think major evaluation also will be done in online mode
80	As we have joined Ph.D in spring semester and due to covid scenario we all are currently at our home town. It is difficult to shift in the middle of the semester when there is full fledge classes going. so it is better if the semester classes and major exams are conducted online mode. shifting will be easy in the
81	As we noticed that the 1st and 2nd covid wave came in march April , and recently WHO has also warned about new variant which is more infectious than omicron also , so according to me this semester should be complete online including major exams because for only some of days shifting to college and then go back to home will not be good and because the covid cases have been found in college hostels so we should not take risk ,so we should wait just for this semester, after this i hope the covid pandemic will end and then we can come back to college and also as i heard that, hostel is
82	As you mentioned , there must be a buffer time of atleast 3 weeks so that all can plan accordingly to onboard . With majors starting in the 1st week of april itself , i feel that there is no proper scope for conducting offline classes for such a small duration of time , roughly around 10 days as all the attendance policies etc might get disturbed and can create confusion among students. The 2nd thing is that if majors are offline , the students have to come all the way to delhi from far away places just to give majors and many of them who doesnt have any practicals or labs this summer , should plan return journey also after the majors and it would create lot of disturbances before the majors and hostel settlements too. So i feel that continuing the flow of this online semester till the end of it would be a
83	At the earliest, also please consider conducting practical's for 2020 entry students during this semester itself. I.e, please conduct PYP, CMP and any other first year lab course starting from March
84	Attending classes in online mode is not a problem. If required only evaluations can be held on campus.
85	Audit criteria to be continued this sem and classes and exam to be inperson
86	Audit policy should stay for UG students and from March 2 subsequently all classes and evaluations to
87	Because , for girls hostels are not available, therefore things should be made normal only when that is done too. Because living off campus is neither financially okay nor in terms of safety therefore when hostels are available, then only in person classes should be taking place.
88	Because our semester exams will be on the beginning of April, if we are onboarded in march it will not be effective in terms of our semester preparations and completing assignments. As we hadn't been allotted hostel we have to look for off campus accommodations in covid situation. Since iam from tamil nadu iam not familiar with delhi and it will take a little more time to arrange accommodation. So it will
89	Before Major everything should be held online and Major in person.

90	Being a final semester student of MTech it will be difficult for us to find an accomodation for just two months. This should be under consideration.
91	Bhaiyo I am of the opinion that : All this drama of onboard be done after the Major exam- mid April " Offline classes be resumed after the Major exams , Otherwise it will adversely affect the preparation for Major exam and mostly for mtech , there is no hostel accommodation in this semester so it will be
92	Boarding of students in staggered manner will take atleast 2-3 weeks (approximately upto 15.03.2022) and major exam is ending on 12.04.2022. It will be very difficult for those students who have not got accommodation in hostel, to search proper accommodation for a short period of time (for a month). In view of above, this semester may be conducted online including major exam. Depending
93	Boarding of students in staggered manner will take atleast 2-3 weeks (approximately upto 15.03.2022) and major exam is ending on 12.04.2022. It will be very difficult for those students who have not got accommodation in hostel, to search proper accommodation for a short period of time (for a month). In view of above, this semester may be conducted online including major exam. Depending

99	Boarding of students in staggered manner will take atleast 2-3 weeks (approximately upto 15.03.2022) and major exam is ending on 12.04.2022. It will be very difficult for those students who have not got accommodation in hostel, to search proper accommodation for a short period of time (for a month). In view of above, this semester may be conducted online including major exam. Depending on pandemic
100	Boarding of students when the semester is just a month away from completion doesn't make sense, it will take away valuable time and will be a disruption in the middle of the academic semester as many
101	Both classes and evaluation continued to be online at least for this semester
102	Both classes and evaluation must be online so that there is no wave like chances again
103	Both classes and evaluation online , atleast for this semester
104	both classes and evaluation online at least for this semester
105	Both classes and evaluation online, at least for this semester
106	Both classes and evaluation online, at least for this semester
107	Both classes and evaluation online, at least for this semester for 1st year PG course
108	Both Classes and evaluation Online. If anything offline then please provide the hostel in Campus
109	Both classes and evaluation should be in online mode for this semester because more than half semester has gone. Now if we'll come there then we need to time to adjust . Thereafter major will come
110	Both classes and evaluations should be conducted online for this semester
111	Both Classes and Evaluations should be done online in this semester
112	Both classes and evaluations to be held online for this semester
113	Both classes and evaluations to be held online. In my case, to travel 2600 kms just for 15 days is quite difficult. And if we were to onboard only for major evaluations, then adapting for the new environment would take sometime, which might clash with the major exams preparation. Offline classes and
114	Both classes and exam evaluation online for the ongoing semester

115	Both classes and exams online, REASON- It would not be possible to be safe from covid in hostels, as we have shared rooms as well as common bathrooms
116	Both Evaluation and Classes should be held online. If they are supposed to be in person then hostel should be given to M. Tech students as well since it is very risky to leave outside the campus due to
117	Both evaluation and teaching to be done online as most of the evaluation has already been done
118	Both evaluations and classes in online mode
119	Both online
120	Both online (teaching and evaluation)
121	Both online classes and exams
122	Both online classes and exams. Hostels have not been allotted for 2 years and there is no point in coming to Delhi for just 1 month. PG was being neglected the most and there is no point in even
123	Both Teaching & Evaluation for this semester to be online
124	Both teaching and evaluation online.
125	Both teaching and evaluation should be online for this semester.
126	Both teaching and evaluation to be done online as we are not given accommodation in hostels and it would be difficult to arrange for accomodation for such a short duration as more than half the semester
127	both teaching and evolution will be online mode since half of the semester was going on online, hence i don't want to change anymore for this semester. Thanking you.
128	both teaching and Major exam to be held online for this sem
129	Call from March onwards. But please keep the audit policy in place. We had half the semester online and mid term evaluations online as well. This was more than half the duration of the sem being online and hence should be sufficient grounds to keep the audit policy of 1 core and 1 elective audit in place. We had picked the courses at then beginning of the sem under this assumption, hence would really
130	Campus should be opened in offline mode only if IITD provides for hostel facility to MPP Students
131	Can continue this semester
132	Can start normally from next semester
133	changes in mid semester is very difficult as after minors load in all subjects is very high meeting the deadlines for assignments and term papers and also the course. its better if the classes and evaluation are online so that semester goes smooth. because if evaluations are in person then again
134	classes and evaluation both should be online for the current semester.
135	classes and evaluation both to be held online just for this semester
136	classes and evaluation online
137	Classes and Evaluation should be online , consider credit for the auditted subject also , last minute
138	Classes and evaluation should be online for this semester
139	Classes and evaluation should be online. Consider credit for the audited courses also.
140	Classes and Evaluation to be conducted online for this Semester as well. Switch to offline mode from
141	Classes and Evaluation to be conducted online for this Semester as well. Switch to offline mode from
142	Classes and Evaluation to be conducted online for this Semester as well. Switch to offline mode from
143	Classes and Evaluation to be conducted online for this Semester as well. Switch to offline mode from
144	Classes and Evaluation to be conducted online for this Semester as well. Switch to offline mode from
145	Classes and Evaluation to be held online for this semester
146	Classes and evaluations to be held online for this semester.
147	Classes and major evaluation will continue in online mode for this semester II.
148	classes as well as evaluation (major exam) to be done in online mode.
149	Classes in hybrid mode and online evaluation (for this semester)
150	classes should be continue in online mode for this semester in between we are(MTech student first
151	Classes should be started offline only after allotment of hostel , offline classes should be started only if
152	Classes to resume in person after major evaluation
153	Coming in between the last month of the semester will disturb our academics as 2-3 weeks will get wasted . Offline exams should be conducted from the next semester so that we can freshly and easily
154	complete offline from next sem
155	Complete online (including major and other evaluation)
156	Complete online sem
157	Complete online semester
158	Complete online semester with online major . Or give hostel to us we are not going to live outside the campus. Do this semester complete online as 1st

159	Complete online(including major and other evaluations)
160	Complete semester including major online.
161	Complete semester including online major exam
162	Complete Semester Online along with Evaluation
163	Complete the semester online
164	Complete the semester online
165	Complete the semester online and next semester in person
166	Complete this semester - both teaching and evaluation - online. Currently in last semester. Only project work remaining, other courses completed towards credit requirement. So no classes to be attended, and lab resources not required for my current project. So for just 2 months, booking
167	Complete this semester and exam via online, it will be difficult to change the mode in the midway of
168	Complete this semester in online mode only, including all evaluations.
169	Complete this semester online (including tests also) and only conduct labs in person.
170	Complete this semester online, teaching and evaluations both online
171	Complete this semester online. Start the next semester offline
172	COMPLETELY ONLINE FOR THIS SEMESTER. There is around one month left in 2nd semester, now the quizzes will start soon after the minors, and I have also taken 2 electives. There will be a lot of pressure of studies and in such a situation will have to travel to Delhi, due to which there is a seriously high risk of getting covid. I've had covid before so I don't want to hurt myself physically,
173	COMPLETELY ONLINE FOR THIS SEMESTER. There is around one month left in 2nd semester, now the quizzes will start soon after the minors, and I have also taken 2 electives. There will be a lot of pressure of studies and in such a situation will have to travel to Delhi, due to which there is a seriously high risk of getting covid. I've had covid before so I don't want to hurt myself physically,
174	Completely Online including evaluations
175	Completely online semester. Institute should first test the waters with half on campus, half at home hybrid before jumping into completely offline.
176	Completely online this semester
177	Conduct classes online but start offline labs
178	Conduct this entire semester online. Classes as well as examinations should be held online for the remaining semester. In person classes as well as exams in person should resume from next semester.
179	Considering the present scenario it is best to let this semester go online.It will be very difficult especially final year mtech students from different parts of country to find room outside campus for less than one month.We also have many assignments in March and we cannot afford to come to delhi to settle and also complete our work in parallel. Those who have problem in homes and want to come
180	Considering the uncertainty and gathering of students across country, I would request to start in
181	Considering travel risks , restrictions not possible to come this sem
182	Continue all semester activities online. Switching in the middle of the month will lead to wastage of time in onboarding planning on the students' side, and a mismatch in learning expectations, ultimately
183	Continue and end this semester in online mode(including evaluation)
184	Continue both classes and evaluation in online for this semester
185	Continue both teaching and evaluation online
186	Continue both teaching & evaluation online for this semester because already half time of this
187	Continue both teaching and evaluation for this semester online
188	Continue BOTH TEACHING and EVALUATION in ONLINE mode
189	Continue both teaching and evaluations for this semester in online mode
190	Continue classes and assessments including Major exams in online mode for this semester. Offline
191	Continue classes and evaluation in online as it is ineffective to resume activities in offline for just 15
192	Continue classes and evaluation of this semester online and after that resume offline classes
193	Continue classes and evaluations in online mode
194	Continue classes and evaluations online till COVID is completely over
195	Continue classes online (without onboarding) till April 1, thereafter in-person Major exams
196	Continue classes online including all evaluations. After it starts offline semester.
197	Continue classes till end of semester including evaluations in online mode in view of limited time available for offline classes. Next sem may be fully offline.
198	continue current online mode
199	Continue entirely online- classes and examinations

200	Continue in online mode .. start in person from next semester
201	Continue in online mode only till this semester.
202	Continue in online mood for these semester
203	Continue online and take Majors in-person for all. Do not force to onboard in between countless
204	Continue online atleast for this semester and Offline only when hostel is allotted for MTech students.
205	Continue online because hostel accomodation might not be provided
206	Continue online class and evaluation should be online.
207	Continue online classes
208	Continue online classes for the rest of the semester as only one month is remaining Changing thing
209	Continue online classes for this sem, evaluations to be online. Make everything offline from next
210	Continue Online for everything
211	continue online for this semester
212	Continue online for this semester (Both teaching and evaluation) and start in-person classes from next
213	Continue online including major
214	Continue online teaching and evaluations for this semester as shifting and adjusting in mid of the semester along with completing academic work (assignments and classes) would be difficult. If hostels are not provided to us residing outside campus in COVID situation and in general too for girls is not
215	Continue online teaching and exam for this semester.
216	Continue online teaching and make next sem completely offline for everyone.
217	Continue online teaching and online evaluation for this semester only
218	Continue online teaching as well as evaluation for this semester
219	continue online teaching for this semester
220	Continue online this semester. Only Major can be held in hybrid mode like last year. Start offline from next semester onwards to be sure of the situation.
221	Continue online till the end of this semester
222	Continue Online(Classes and Evaluation) for this semester.
223	Continue online this sem since its already mid sem and start in person classes and exam next sem.
224	Continue regular online mode for this semester
225	Continue remaining teaching as well as Evaluation for the ongoing sem Online only.
226	Continue semester online and majors also online
227	Continue semester online. Both teaching and evaluation held online
228	Continue teaching and evaluations for this semester online.
229	Continue teaching and evaluations online. Though covid numbers are decreasing but daily death count is alarming. Active daily count is low or fudged we cannot trust government
230	Continue teaching online and evaluation (major) online , Full time offline mode may be better after
231	Continue teaching and evaluations(including Major) to be held in for this semester online ,Resumption of In-person from next Semester and lab work can perform in offline mode in batch during
232	Continue teaching and all evaluations in online mode for this semester
233	Continue teaching and evaluation for this semester online
234	Continue teaching and evaluation for this semester online because, for male MBA students, we don't get hostel facility and coming to Delhi and finding accommodation almost at the end of semester would be tough and inconvenient. Moreover, staying outside the campus and daily commute would be risky
235	Continue teaching and evaluation for this semester online.
236	Continue teaching and evaluation for this semester online.
237	Continue teaching and evaluation of major for this semester online, then after this semester, start the
238	Continue teaching and evaluation online for this semester
239	Continue teaching and evaluation online for this semester also and resume both things from next
240	Continue teaching and evaluation online for this semester. It will take 2-3 weeks to onboard students. After 5 weeks we will have our majors. The whole rythum of study will be disturbed. So I suggest to
241	Continue teaching and evaluation(including major) for this semester online as it would be very difficult to find hostels as college doesn't provide for DMS boys
242	Continue teaching and evaluation(including major) for this semester online.
243	Continue teaching and evaluation(including major) for this semester online.
244	Continue teaching and evaluation(including major) for this semester online.
245	Continue teaching and evaluations (including Major) for this semester online and in person for the lab
246	Continue teaching and evaluations both in online mode for this semester until covid surges becomes

247	Continue teaching and evaluations for this semester online
248	Continue teaching and evaluations for this semester online
249	continue teaching and evaluations for this semester online
250	Continue teaching and evaluations for this semester online and resume in person teaching and
251	Continue teaching and evaluations for this semester online especially for those who reside outside
252	Continue teaching and evaluations for this semester online—resume in-person from next semester.
253	Continue Teaching and Evaluations for this semester online; offline classes from Next Semester both
254	Continue teaching and evaluations for this semester online.
255	Continue teaching and evaluations for this semester online. Coming to Delhi all of a sudden will pose lot of administrative hassles. Sufficient time of about 6-8 weeks should be given to enable us to
256	Continue teaching and evaluations online
257	Continue teaching and evaluations online for non-onboarded students
258	Continue teaching and evaluations online for this semester (as many first year students don't have lab
259	Continue teaching and evaluations online for this semester and in person classes and evaluations
260	Continue teaching and evaluations online for this semester. Students coming from distant states without hostel allotted will have very short time to settle and appear for major.
261	Continue teaching and evaluations online, monitoring the obedience to covid protocols is poor on campus. It is safe to open only after seeing the normality for some more time. Let only sincere
262	Continue teaching and evaluations(including Major Exam) online for this Semester due to Accommodation issues (hostels are not provided by IITD to CEC students)
263	Continue teaching and exam in online mode.
264	Continue teaching as well as evaluations (including Major) ONLINE.
265	Continue teaching as well as evaluations for this semester in online mode. It will be difficult to arrange for accommodation for non-hostellers for this short period of time.
266	Continue teaching as well as evaluations online for this semester
267	Continue teaching at line till march end seems good and safe
268	Continue teaching for semester online, Major can be held in person
269	Continue teaching for this semester and evaluation online
270	Continue teaching for this semester and evaluations (including Major) online to meet the deadlines of the current semester as they are. For else travelling in between semester will lead to loss of study, time schedule and further cause a delayed semester result and greatly impact already hampered planned summer internships and projects. Going completely offline from the next semester will only be a nice idea since then we would be giving both students and hostels to accommodate in peacefully and utilize spare time. For Now, Amidst exams and semester study none of us shall be able to focus
271	Continue teaching for this semester and evaluations online ,after majors teaching and evaluations to
272	Continue teaching for this semester and evaluations online ,after majors teaching and evaluations to
273	Continue Teaching for this Semester and Evaluations Online mode.
274	Continue teaching for this semester and evaluations(including Major) online
275	Continue teaching for this semester in online mode and also do not force out-station students to appear for in-person major exams as it would be very difficult for them to accomodate themselves in new city for 5-8 days. This would be especially critical for female students, students with comorbidities, and those from humble background. If institute cannot provide them hostel, then permit online
276	Continue teaching for this semester online
277	Continue teaching for this semester online as well as evaluations should be online keeping in view the semester closing date is april 1,2022
278	Continue teaching for this semester online (including all the evaluations)
279	Continue teaching for this semester online & evaluation (including) to be held in online
280	Continue teaching for this semester online along with evaluation. Offline classes from next sem.
281	Continue teaching for this semester online and all evaluations (including Major) to be held in online
282	Continue teaching for this semester online and all evaluations (including major) to be held in online
283	Continue teaching for this semester online and all evaluations(including Major) to be held in online only
284	Continue teaching for this semester online and all evaluations(including Major) to be held in online only
285	Continue teaching for this semester online and all evaluations(including Major) to be held in online
286	Continue teaching for this semester online and all evaluations(including Major) to be held in online
287	Continue teaching for this semester online and all evaluations(including Major) to be held in online
288	Continue teaching for this semester online and all evaluations(including Major) to be held in online

289	Continue teaching for this semester online and all evaluations(including Major) to be held in online
290	Continue teaching for this semester online and all evaluations(including Major) to be held in online
291	Continue teaching for this semester online and all evaluations(including Major) to be held in online only. If Major exam is only in offline mode only then Date of Major exam should be revised (i.e. atleast
292	Continue teaching for this semester online and also major to be done online for this semester.
293	Continue teaching for this semester online and also the evaluations(including Major) should be held online. The cases might increase again once we gather in campus for in person classes and
294	Continue teaching for this semester online and conduct evaluations(including major) online
295	Continue teaching for this semester online and evaluations (including major)to be held in online only.
296	Continue teaching for this semester online and evaluations also to be held online only as CEC Batch will not be allowed hostel accomodation it would be inconvenient to be available.
297	Continue Teaching for this semester online and evaluations will also to be held online.
298	Continue teaching for this semester online and evaluations(including Major) also to be held ONLINE as it would not be feasible to make all arrangements and accomodate outside campus just for few days.
299	Continue teaching for this semester online and evaluations(including Major) to be held online
300	Continue teaching for this semester online and evaluations(including Major) to be held online
301	Continue teaching for this semester online and major evaluation to be held in person for those who have onboarded before 02 Mar 22 whereas remaining can appear for online evaluation...
302	Continue teaching for this semester online and start in-person classes from next semester in full
303	continue teaching for this semester online and. evaluation including major be online untill next
304	Continue teaching for this semester online as well evaluation to be held online.
305	Continue teaching for this semester online with evaluations
306	Continue teaching for this semester online with online evaluation to avoid subsequent accommodation issues, consider credits for audited subject as well.
307	Continue teaching for this semester online, all evaluations(including Major) to be held in online.
308	Continue teaching for this semester online, also conduct evaluations(Major) online.
309	Continue teaching for this semester online, also conduct evaluations(Major) online.
310	Continue teaching for this semester online, also conduct evaluations(Major) online. Since Hostels are not being provided to Masters CEC Batch students - Just for few days it won't be practically feasible for us to come to Delhi for Offline Processes and search accomodation outside campus. So,Continue teaching for this semester online, also conduct evaluations(Major) online. (Atleast for PG Students).
311	continue teaching for this semester online, also conduct major evaluations online
312	Continue teaching for this semester online, also keep the evaluations (including Major) to be held
313	Continue teaching for this semester online, and evaluations online for this semester.
314	Continue teaching for this semester online, but labs and exams in person
315	Continue teaching for this semester online, calling only the graduating students who have pending laboratory courses, only the evaluations (including Major) to be held in person.
316	continue teaching for this semester online, evaluations (including Major) to be held online also
317	Continue teaching for this semester online, evaluations also to be held in online mode and start in-person classes from next Semester onwards
318	Continue teaching for this semester online, evaluations(including Major) to be held online
319	Continue teaching for this semester online, evaluations(including Major) to be held online
320	Continue teaching for this semester online, evaluations(including Major) to be held online
321	Continue teaching for this semester online, from next semester start with offline classes
322	Continue teaching for this semester online, including evaluations(including Major)
323	Continue teaching for this semester online, only evaluations(including Major) to be held in online .
324	Continue teaching for this semester online, only evaluations(including Major) to be held in ONLINE
325	Continue teaching for this semester online, only evaluations(including Major) to be held in online mode
326	Continue teaching for this semester online, with online evaluations.
327	Continue teaching in online mode and exams also to be held in online mode
328	continue teaching including majors as well for this semester.
329	Continue teaching online and also evaluations to be held online. As few number days remains to complete this semester and it will be difficult for everyone to come adjust and study then major will
330	Continue teaching online and evaluations as well
331	continue teaching online and majors also online because its very frustrating to shift in between. From
332	Continue teaching online for this semester and all evaluations online. From next semester start

333	Continue teaching online for this semester and take majors online
334	Continue teaching online including evaluation. (Both class and evaluation should be online)
335	Continue teaching online this semester. also evaluation to be online if accomodation not available in campus (its difficult time and risky to stay outside campus)
336	Continue teaching online till next semester and evaluation including major should also be online
337	Continue teaching online with online exams as well
338	Continue teaching this sem online including evaluations
339	Continue teaching this semester in online mode and evaluation also to be held in online mode for this
340	Continue teaching this semester Online along with evaluations.
341	Continue teaching this semester online along with evaluations(including Major) and in-person classes can be conducted from next semester
342	continue teaching this whole semester online, including evaluations
343	Continue teaching whatever the way you want but conduct evaluations online.
344	continue teaching, evaluations for this semester online- Since, no hostel allocation is allowed for masters students and less duration of semester remaining
345	Continue teachf we will be provided with the hostels, then offline will be better as it is difficult to stay outside campus in this covid times, otherwise continuing teaching for this semester online is better
346	Continue teacing and also evaluations for this semester online . We have not been allotted hostels. Being female students and with less time available to make the arrangements it will take time and effort for the major that will be arriving soon. As accomodation has not provided to us inside the campus, if any new variant were to occur and we cannot predict the severity, it would be risky to stay in a new place with no much knowledge of how to take care of self if we were to get infected. Kindly
347	Continue teching for this semester online as only one nonth is left for the classes before major exams and major evaluations to be also held offline for this semester if possible.
348	CONTINUE TECHING ON ONLINE AND EXAMS IN ONLINE MODE TOO
349	Continue the entire semester online including evaluations.
350	Continue the remaining semester in online please
351	continue this entire semester online including the exams. and resume offline classes and all from next
352	Continue this semester and evaluations online. Please allot M.Tech students hostel and then call us
353	Continue this semester in online mode as many students are doing some some extra work and intern fir their upcoming placement. Continue next semester in complete offline mode.
354	Continue this semester in online mode because thravelling in between will hamper our momentum. Major can be taken in both online for non-boarded and offline for those who boarded. Then we all can
355	Continue this semester in online mode only. Both classes and evaluation. Its difficult to arrange place for out of hostel residents to arrange everything in bntween examination.
356	CONTINUE THIS SEMESTER IN THE ONLINE MODE ONLY SINCE THERE IS ONLY A MONTH
357	Continue this semester online
358	Continue this semester online (including evaluation) for atleast M. Tech students as we haven't been allotted any hostels as of yet and arranging for accommodation on a short notice that too at a time when major schedule will be near will be time consuming, hectic and tiresome. Hence, the semester
359	Continue this semester online and offline from next semester
360	continue this semester online because everyone coming to the campus now will disturb the ongoing semester, next semester should be offline.
361	Continue this Semester Online for both classes and evaluations, Resume Offline things from next semester with proper hostel arrangement to ensure that all will get hostel accommodation, at least
362	Continue this semester online including evaluations.
363	Continue this semester online including Majors
364	continue this semester online only, including evaluations.
365	Continue this semester online with evaluations also in online mode. Assuming, the classes are started in offline mode, atleast 3-4 weeks are required for making suitable arrangement for accomodation outside campus, as all students cannot be given hostel accomodation. If all students would be given hostel accomodation (Mtech as well), then it would be feasible. Otherwise, it would be very difficult for students to arrange for accomodation simultaneoulsy with managing online classes, assignments, course projects etc. And since major part of this semester would have already been completed by the
366	Continue this semester online, since have of the semester is done online and it'll be tough for everyone to again adjust to the offline conditions (even for professors) which could affect everyone's

367	Continue this semester online. Next semester to be held in person. With 01 Apr as the date of last class changing location, accomodation and eveything for a month will not be effective.ive.
368	continue this semester teaching and evaluations online mode.
369	Continue this semester to be online mode.
370	Continue with online teaching and online evaluations.
371	Continue with the current policy that is online class with offline exams for onboarded Students only.
372	Continue with the online mode for both classes and evaluations for the ongoing semester.
373	Continuing this semester online and starting offline classes from next semester
374	Continuing with online classes and online evaluation for this semester
375	Continuing with online classes and online evaluation for this semester
376	Continuing with online classes and online evaluation for this semester
377	Continuing with online classes and online evaluation for this semester
378	Continuing with online mode as going. Since shifting for a month only for final semester students is not reasonable for all. Decision of coming to hostel should left on students as individuals choice.
379	Credit be given for Audit of some courses.
380	Current semester should be online including major.
381	Currently , we are in the last semester of M.tech with only project work pending. We also don't need access to labs. We are being told that we won't be provided hostels.we have to find our own accomodation outside college. With only 2 months left for the course completion, we prefer online
382	Date should be as early a ls possible . 26 Feb is the most appropriate date
383	Dear sir please note my concern, we are at really end of semester shifting in between continued classes and assignments might impact our preparation for majors also in any case we will be staying at IIT for not more than 30-40 days then we are going to pursue our internships and will be joining
384	Dear sir, I am a second semester M. Tech. student of production engineering. As we all know, hostels are not allocated to us. But, we saw the Institute infrastructure newsletter which says new hshotel construction to be completed by march. Sir, if possible, please alot us the hostel seats and whichever day you call us, we are ready to be present in person for classes as well as evaluation. Affording hostels outside is costly and also insecure in comparison to campus. We are also itching to get back
385	Dear sir/ma'am, I think this semester should be online because we will have to manage all the things for just 20 days. And if you are calling then please provide hostel in the campus because it is hard to survive in the villages near IIT Delhi. Hope you will consider it. Thankyou!
386	Do offline whenever the institute wants but please give hostel accommodation. Hostel accommodation must be the institute's atmost priority before they do things offline.
387	Don't close audit window durig offline sem as well
388	During this tough conditions continue the sem in online is much better many students basically belongs from different state and we need to book our flight and train. Ticket before exam and come to campus is bit disturbances so from next semester offline classes are better.
389	Either hostels should be given if there are offline classes, otherwise don't take offline classes
390	ENTIRE THIS SEMESTER WILL BE ONLINE
391	Entire semester online including evaluations
392	Evaluation should be held online
393	Evaluation should be online , consider credit for the auditted subject also , last change policy will be
394	Evaluation should be online , consider credit for the auditted subject also , last change policy will be
395	Evaluation should be online , consider credit for the auditted subject also , last minute change policy
396	Evaluation should be online , consider credit for the auditted subject also , last minute change policy
397	Evaluation should be online , consider credit for the auditted subject also , last minute change policy
398	Evaluation should be online , consider credit for the auditted subject also , last minute change policy
399	Evaluation should be online, consider the credit of audited subject, changing policy in last minute will
400	Evaluations and classes continue to run online.
401	Even if all the safety arrangements and covid protocols are followed inside the campus we cannot stop the students going out of campus.Once the cases starting rising it will go out of our control due to the gatherings in classrooms,hostels etc..It will create chaos again. But we can look into the last option i.e from March 14-Continue teaching for this semester online, only evaluations(including Major) to be held in person.In the last semester only the onboarded students gave in person exam,but it would be little
402	Everything online
403	Everything Online

404	Everything online
405	Everything online for this semester.
406	Everything ONLINE for this semester.
407	Everything online this semester. Offline next semester. Humble request to provide hostel to MBA boys, be it double occupancy. We really wish to have peer learning in campus
408	Everything online till current semester
409	Everything should be held online
410	Everything should be online as it is going so far till the next academic session.
411	Everything should be online for this semester
412	Everything should be online this semester.
413	Everything to be held in person from next semester.
414	February 21 - all classes and evaluations to be held in person
415	For anyone, not a hosteller it will be difficult to find accomodation for such a short period of time. So we should consider classes and evaluation for this current semester in online mode only and the from next semester onwards it could be done well planed and in advance.
416	For Executive MBA everything should be kept online till the end of this semester. Next semester could be offline, this will give us a breathing time to manage our resuming offices, shifting residence near to IIT Delhi. The classes could go online from 14th if an option of hostel accommodation could be provided at IIT Delhi. Kindly consider this request for Exec MBA batch, else it would be a complete
417	for extended degree students or students residing off-campus classes and evaluation should be held online as an option for their convenience till the end of this semester
418	for extended students it is difficult to find rooms. please continue online semester for classes and
419	For final year students, this means we'll have to come to campus only to attend 2 weeks of inperson classes. So in my view, it is best to finish this semester teaching online while exams can be held in
420	For MBA full time 2nd year students (male), hostels are not being provided. In that case how can we come to campus and stay on Delhi roads? We need offline classes only if hostels are provided. If hostels are not provided and still you decide to make offline classes, then it should be optional to MBA students. I am not giving my consent to make it fully offline without hostels. So, make it optional to
421	For me this semester should be completely online cause only 1 month is left and it's quite difficult to settle there and manage studies altogether..and next semester should run in completely offline
422	For Mtech 2nd Semester, I want this semster to continue online along with the evaluation.
423	For Mtech continue teaching in online and evaluation also in online mode
424	For Mtech Final year where no class component is there, MTP evaluation should be done online.
425	For mtech first year , who have not yet been given hostel ,coming delhi and finding a accomodation is bit difficult and that too coming just for a month after than summer break will be there ,please continue
426	For students in their last semester it would be difficult to bring back all the belongings and then take them back after few weeks. So kindly keep students in their last semester in mind or keep the option of
427	for this semester classes and exams shall be continued in online process.
428	For this semester continue online including evaluations for all students including onboarding students
429	For this semester, continue teaching and evaluation including major also in online mode
430	For this semester, pl continue both evaluation and teaching online.
431	From 20th march
432	From 24 march as I am repeating 1st year so my classes are with 1st year students
433	From 3rd semester it should be offline
434	From 3rd Semester: Continue teaching and evaluation online for this semester
435	From 7 March - subsequently all classes and evaluations to be held in person.
436	From April 15 onwards- until then, hybrid mode
437	From April 15-Continue teaching for this semester online and online evaluation (including Major). Start
438	From April all the things should beade offline
439	From atleast March 20
440	From March 14 - Continue teaching for this semester online and evaluations(including Major) to be
441	From March 14 - Continue teaching for this semester online, evaluations (including Major) to be held
442	From March 14 - Continue teaching for this semester online, evaluations(including Major) to be held
443	From March 14 - Continue teaching for this semester online, only evaluations(including Major) to be
444	From March 14 - Teaching for this semester offline(in person), only evaluations (including Major) to be
445	From March 14 - Teaching in person, evaluations(including Major) to be held online.

446	From March 14 - Teaching in person, only evaluations(including Major) to be held online
447	From March 14 but evaluation as per the online rule I mean credit should considered after audit.
448	From March 15 - Continue teaching for this semester online; evaluations, tutorials and labs to be held
449	From March 2 - Continue teaching for this semester online, only evaluations(including Major) to be
450	From March 2 - evaluation to be held in person but classes be held online
451	From March 2 (Classes to be held in person, only evaluation to be held online)
452	From March 2 (or an appropriate date soon after) - Evaluation should be online , consider credit for the auditted subject also , last minute change policy will be difficult.
453	From March 2 offline classes and online exams
454	From March 2 onwards with classes in a blended mode
455	From March 2, conduct classes in person. Do recording for the students who can't attend classes.
456	From March 20 - Continue teaching for this semester online, only evaluations(including Major) to be
457	From March 20 - subsequently all classes and evaluations to be held in person
458	From March 20 online teaching since it is a matter of only 10-20 days before the majors, evaluation
459	from march 20-continue teaching for this semester online,only evaluations (including major) to be held
460	from March 21 - After the Holi teaching should be done online for semester
461	From March 21 start offline. The week of March 14 has the festival of Holi which will necessitate taking a leave of absence from the campus
462	From March 21- subsequently all classes and evaluations to be held in person.
463	From March14 - For this semester have online evaluation
464	from next sem
465	From next semester
466	From Next semester
467	From Next semester
468	From next semester - all classes and evaluations to continue online for the ongoing semester. The rationale being that the threat of COVID variant is still a distinct possibility. Given the recent spurt in COVID cases inside the campus, there is a potential for localized outbreaks to occur putting the lives of senior citizens and people with comorbidities at risk. In case the institute decides to start in-person sessions, there could be a demand for compulsory testing and tracing in case of any such outbreak. This could cause an unnecessary economic burden on the institute. Additionally, it is too short a notice for students to join the in-campus sessions, especially those who will be staying outside the campus. Making arrangements for accommodation is a challenging task and would be difficult for students moving to the city for the first time. The majors also take place in the first week of April after which there is the summer break of over 2 months. The students who wish to return back home will have to move out of the accommodation and again look for new accommodation when the new semester resumes (I hardly think students will look to pay for accommodation while being away from Delhi during the summer break). Hence, asking students to come and join the campus mid-way through this semester is not going to be an easy task and could potentially impact their educational performance in the semester. It would be best for the classes and campus to reopen next semester so that it makes
469	From next semester - There is no point of opening college in between the semester. Kindly continue this semester in online mode. Start the next semester offline.
470	From Next Semester : Continue teaching and evaluation (including major) for this semester online. Also, it won't be feasible for boys to find accommodation for just 15 days.
471	From Next Semester : Continue teaching and evaluation(including major) for this semester online.
472	From Next Semester : Continue teaching and evaluation(including major) for this semester online.
473	From Next Semester : Continue teaching and evaluation(including major) for this semester online.
474	From Next Semester : Continue teaching and evaluation(including major) for this semester online.
475	From next semester onwards
476	From Next Semester onwards
477	from next semester onwards, because we are not alloted any hostel yet. so please allot hostel first then only it is possible and it will take time to settle and major will be there in april only. thats why from
478	From next semester onwards. Challenging to move and adjust to a new location in the last month of semester which may impact studies for major.
479	From next semester would be better

480	From NEXT SEMESTER- Continue teaching AND evaluations for this semester in ONLINE mode, as it will be difficult for new (who have never been in campus since admission) and/or final year students (who have last semester this time) to come for a few hours to campus to give exam. Teaching and
481	From Next Semester.
482	Full Online (No point of Attending the offline classes for 15 days in case of 14 March) and for 2 March it will be more early to join consideration of travelling and all are important) so better it would be if rest
483	full semester online and offline only if there is accomodation facility
484	Fully online including majors also
485	Give a option to carry out this semester alone in online and in-person according to students preference and start in-person class and evaluation from next semester
486	having half online and half offline sem will brought serious impact on one's academics as one's studying technique is differnt in these two methods. SO I suggest to have this sem in online mode and
487	Hostel should be allowed for M.Tech students also
488	Hostels are not provided for mtech students and even in in outside of campus hygienic food and water will be problem. If hostel are provided inam willing to come
489	Hybrid classes with online evaluation
490	Hybrid mode for this semester (incl Majors) and in-person offline classes from next semester
491	hybrid model for Semester II (Both online and offline mode)
492	I am an extended undergraduate and I don't have hostel room allotted to me, so I prefer this sem to
493	I am currently on an exchange program in Germany, will only be returning on Campus in October
494	I am favourable in online class
495	I am highly against switching to an offline setting in the middle of the semester. I have attempted to mention mine, as well as the opinions of my peers: 1. Puts a lot of strain to adjust to offline setting after already giving the minors, assignments and taking classes in online this semester. 2. People who live far will be unable to make arrangements so quickly only to leave again in 3 weeks. So I
496	I am in the final year and I only have two courses this semester. It would be an unnecessary pain to come to the institute just for giving two exams.
497	I believe that being online is preferable because there is a high likelihood of increasing or receiving new varieties in the next days. Even with students on board, class sizes are large, and one student's irresponsibility can result in large-scale instances on campus. It would be preferable to stay in online mode. In the case of a pandemic, even academics had imposed rigorous attendance and participation limitations the previous year. It would be wiser not to jeopardise our lives if all goes well until next
498	I believe that due to the very nature of IIT as a residential campus makes it very risky and potentially hazardous to the health of students, staff and professors. When some students had onboarded in January, COVID cases had spread like wildfire throughout the hostels. I would suggest that we keep the health and safety of everybody as our first priority right now and refrain from onboarding students.
499	I believe the offline semester plus exam should be resumed next semester because relocating to a new state in the middle of the semester that too towards the end would be very disturbing for any student including me. The institute has done a fantastic job at making the online studying engaging and examination unique to the circumstances which hasn't taken anything away from teaching as it was. So I believe carrying it on the end of this semester makes total sense. And resuming offline
500	I believe this semester should be done online, since changing it in the middle would be difficult for us to adjust. Next semester on, everything can be offline
501	I belive this semester should be continued as an online semester and major evaluation should also be held in online as by changing mode from online to offline will affect the students mentally . From next semester offline classes should start as the students will get ample time and energy to shift backfrom
502	I can't arrange hostel fee payment quickly. so I would not want to take offline classes.i would like to continue online in this semester and offline in next semester .thanku
503	I can't arrange hostel fee payment quickly. so I would not want to take offline classes.i would like to continue online in this semester and offline in next semester .thanku
504	I don't want evaluations to be held offline. If it's conducted then only for exam purposes I should be traveling all the way from Tamilnadu to Delhi, which put me in a serious threat due to the pandemic.
505	I feel I want both classes and exams online. It's because if campus opens fully, then social distancing will not be possible at all and chances of virus getting infected increases. Also I am a final year student, I have only one HUL course to do this semester, for that I don't want to risk by coming to College either for classes or exams. If I had core courses, then I would have preferred to come to

506	I feel like being online is better because there are high chances of increasing or getting new variants in the subsequent days. even if students onboard the strength of classes are very high and one student's negligence can lead to huge cases on campus too.It would be better to continue in online mode. even professors had made strict restrictions on class attendance and participation from the previous year in the view of pandemics too.it would be better not to risk our lives if everything is ok till
507	I feel that this semester should continue as it is in the online mode. In case we decide to go offline, it would take us students some time to get back used to the new normal, but that would be a critical time as the majors would be approaching. More than that, the idea that there could be a covid outbreak at any moment would not help us feel comfortable immediately. The best would be to ease this process
508	I just want to ensure this period is not going to launch another spread. I would request if it's watched for another 2 months just to get sure it's not spreading anymore.
509	I prefer online classes and evaluation till end of this semester
510	I prefer that let's make this whole semester in fully online mode and then let the students onboard in the summer break which gives them sufficient time to onboard and then start the next semester same
511	I prefer that teaching for this semester should be continue in online mode including evaluations because it will be quite difficult for all students to onboard in this much time and a big disturbance will
512	i support onlinr classes as most of things are recorded we will face it difgicult to change to completely
513	i think evaluation and classes should be totally online for second semester because for lab classes already extra time is provided in April Month and All M.TECH student are not getting hostel so it will be not good for student to come in between semester and reside outside the campus. so it will be good
514	I think i will prefer this semester to be online. As we know that semester load increases towards the end of the semester and that only month of March is available till majors. So lot of time will be wasted in moving to campus that includes traveling, getting a room, buying up essentials for the room. That too when I don't know anything about the city since I haven't traveled there before. So, managing all this in 1 month window without losing on Semester is almost difficult. I would want that college starts
515	I think in person classes and evaluation should be from after this semester with lab classes so that everyone got a sufficient time to settle with new mode as we know it has been a very long since we are
516	I think it would be better if this semester is continued online and from next semester onwards, Offline
517	I think it's too late to bring the entire luggage and stay outside the campus (New place) for less than a month. Arranging an accomodation, food, basic daily amenities in a new city for less than a month is not at all feasible. If the accomodation can be provided inside the hostels, then there is no problem in coming. Else, online semester should continue till the end for PG final year students with Major
518	I think online classes and online evaluations should be preferred because anyways we have adapted to this online thing and covid is not yet completely over. I have lost my grandmother due to covid and hence I know the loss covid can cause to anyone. So, I believe untill this semester is finished, there should be complete online classes and evaluations. After this semester, if covid cases are reduced to
519	I think online classes with online exams(for non onboarded) can be done in this semester because the starting of offline classes would become effective from the new year in which new subjects appear because in this semester we have already covered half of the portion of each subject. So I think the in
520	I think Teaching and evaluation should be performed online for this semester as living outside in this COVID environment can be a serious problem specially in delhi
521	I think teaching should be completed online for this semester because adjusting with offline classes right before majors can affect our studies and hence majors.
522	I think the resumption of regular activities on campus should be done in the next semester onwards, we have left approx only one month of this semester. The students whoever wants to come campus are already their and the left one will join soon. So for this semester it can be optional for students ,
523	I think this sem should be online for mtech because no hostel provided for them....living in hotel is dangerous..... also only calling for exam will make too much pressure before exam.....finding place to live affordably and in good condition without health issue with all laptop etc
524	i think this semester should be completed in online mode only along with exams . next semester
525	I think this semester should be continued in online mode as there is high risk of transmission in hostels due congestion. The onboarding should probably be postponed to next semester as the Covid
526	I think this whole sem to be held online as we have been adapted to this environment now. In-person classes midway wouldn't be a good idea. This is a significant time, covid cases are going down, but the opening of classes can cause a sudden rise. We have our hostel attached to the campus, so there
527	I think we should avoid conducting in person classes for this semester.

528	I think we should continue from march 20 or so .
529	I want class should be online but exam should be offline
530	I want entire semester and major also online because it is very difficult to stay for only 15-20 days in hostel after that major exams will come and we have to go back to our homes.
531	I WANT IT THE ONBOARDING & LABS AFTER MAJOR. REASON - 1) SECOND SEMESTER HAS ALREADY MORE THAN HALF COVERED ONLINE. YOU WILL GET HARDLY A COUPLE OF WEEKS AND THEN OUR MAJOR COMES. MANY PEOPLE SUFFER HEALTH ISSUES ON CHANGING PLACES, FOOD, WEATHER, IT TAKES SOME TIME TO BE HAPPY TO BE HABITUATED. IN THAT INTERVAL WE WILL BE FACING OUR MAJOR EXAM. 2) MANY ARRANGEMENTS ARE TO BE DONE BY STUDENTS BEFORE GOING TO CAMPUS AND LIVE THERE PERMANENTLY. AFTER MINOR, IT'LL TAKE SUCH TIME TO TOTALLY SETTLE IN
532	I will be very happy (Including my parents) if major is also Conducted completely in online mode, because Sir I am from Assam , So for a students like me who is very far away from their home is quite Risky to Come inside the campus, because Sir just before the exam if I infected by Covid-19 Then my whole semester will ruined, And in Delhi there is no one whom I know , At the same time my parents all the time thinking about me that I am Safe inside the campus or not , So Sir it's a big trouble for me as well as my parents if I have to come inside the campus . And Sir as you know Delhi is the hotspot of India So sir there is a High tendency to spread COVID-19 if all students from different states come
533	I will request to continue this semester in online mode and also the examination to be held in online mode only, as it will be very difficult for me to move to Delhi in between the semester. Also the hostels are not being provided to us, in that case finding a suitable accommodation will be an impossible task. The corona wave is receding, but the risk is still there, so my parents would not like to expose me to
534	I wish to attend all the classes offline from 2nd of March
535	I would like it the way it is presently going i.e both classes and exams online.
536	I would like to request the authorities to hold this full semester (including teachings and evaluations) online and resume offline from next semester onwards, as right now campus return might lead to disruptions in our schedule making it hard for us to complete the semester in a productive manner.
537	I would prefer if the college starts in the offline mode from march 20, 2022
538	I would prefer online classes and evaluation. It's suits my work life.
539	I would prefer to on-board from next semester because there is not enough time to move from home to college in between the semester. That will result in missing class and at the end of semester we have a lot of academic works to do, that won't be possible with all the moving.
540	I would request the authorities to open the hostel facilities soon for the outstation candidates like me.
541	I'm fine with all three options. However, 2 March (post mid-sem break) will cause least inconvenience to any schedule in case of offline classes. For offline majors, any of them is fine.
542	I'm already working in lab.
543	If audit is allowed, then do after march 14
544	If college is providing in campus accommodation then no issue anytime we can come .if not then it would be difficult to get accommodation outside + food quality .and in case of emergency it's difficult
545	If hostel facility is not available for MBA students, it would be difficult to get accommodation for few weeks and adjust to the environment. I would prefer online mode for this semester.
546	If hostel provided then offline is good because it would be very difficult and required more time find room outside campus. And there is only one month remaining in the major exam. For me offline is better if hostel provided in campus. Otherwise it creates instability . Thankyou sir
547	If hostels are allotted it would be better
548	If M.Tech students are getting hostel, then we are ready to come to campus
549	If major exams are held in person, we do not have any previous contacts for accommodation near the college and it could be a very tedious task before the major
550	If possible please conduct both classes and evaluations online for this semester because it's very tough to change mode from online to offline in between semester.
551	If possible please keep this semester online as it will cause lot of issue during transition and may
552	If possible, after Holi , the subsequent classes and evaluation should be held in person.
553	If teaching for semester is online, then examination too should be online.
554	If the offline classes and exams will start freshly from the next semester that will be much better. Because half of the semester has been spent online, the freshers' new place and atmosphere will take

555	If you are willing to give a specific period of time then as soon as possible. Preferably march 2. If not willing then mid semester break.
556	In Delhi the cases are rising again, I don't clearly understand that aren't we rushing for normal days after sacrificing almost 2 years due to covid (this rush can most certainly waste the efforts and the precautions we took for these two years) (in Covid we have already took too many wrong steps from the day 1 so I don't think there should be any discussion over this topic and online classes and evaluation should continue for at least 3-4 more months) (there is high chances that calling all
557	In March complete offline mode should begin but Mtech students should be given hostel accommodation on campus for their safety and security
558	In my humble opinion , i think Classes should continue in online mode..and exams also..because it is more than half semester that gone in online mode..so in mid -sem it is quite difficult for us settled down in campus...after major....we want to come to campus for all activities to be held in offline
559	In my opinion it is not sensible and feasible to just call students for a mere 15 days for attending classes or just for giving exams, the students would have to spend alot in travelling for a mere 15 days, so in my opinion the semester should continue online and should be resumed offline from next semester for the safety of the students, if not then coming just for the exams would be more feasible as
560	in my opinion online should be continue for this semester as the date of in person classes 14 then only very few class will be there and there is also end of the semester where we have to submit number of assignment, report and to give presentations. it will be very difficult to search for accommodation and doing all other institute stuffs at the end of the semester. it will impact on our grades. So if possible
561	In my opinion this semester should be online because it is difficult to make a transition in between the semester. Lab should be offline after Majors
562	In my opinion we should keep this semester's remaining teaching and evaluation in online mode. Afterwards we can move to offline mode of teaching and evaluation because it will be more safe
563	In my opinion, it would be better to continue with online classes and evaluations as the sudden transition and accommodation may not be possible for everyone.
564	In my opinion, the current semester should be continued in online mode only, along with online evaluation. From next semester onwards, offline mode should be opted for classes as well as evaluation. As many people have still been showing symptoms of covid-19, it would be much safer to
565	In our semester, we hardly get 3 to 3.5 months and for now more than half of this time is gone as minors are going to get over. With a daily basis progress in the course works, it will become very difficult for the students coming from farther states (like myself from West Bengal), as it will take up almost 2 weeks for going to be completely settled there in the campus hostel by completing different formalities at different places, packing, etc. Also, we will face health issues for some days due to change in food and climate which will directly affect our studies as classes are not going to stop for that time period and it will be a mess to make up for that lost part. As I have goals to apply for higher degrees, this will impact a poor result as only 1 month is left for the "in-person" major exam as stated in the options. So, it is not a good idea according to me to visit the campus just 2-3 weeks before the major exam. It is also absurd that having the classes online and appearing for the major exam in "in
566	in person activities should start after this sem
567	In person classes and evaluations can be conducted from the next academic semester.
568	In person classes be resumed from March 2. In case it is decided to continue online teaching till last day of classes then evaluation (including majors) be per the current procedure since it would be difficult for outstation students to make arrangements off campus for the short duration in which the
569	In person classes be started only after the Major Exam, Otherwise it will disturb the Preparation for
570	In person evaluation will be cumbersome.Please follow the online mode for that too
571	In person from next sem
572	In the midst of a sem, no changes from anywhere should be made. This happened on the start of previous sem for offline exams for onboarded students. The admin should opt for any changes when a
573	In-person, only if accommodation provided in campus
574	Inperson from next semester
575	Instead of disturbing the ongoing semester, it'd be better to have offline schedule from the start of next

576	It is a short semester with omicron infection cases almost in every house. Already people have almost 3 -4 weeks of precious study time. Now disturbing people to move from station and look for rented places and wasting further time. In my case my entire family in Bangalore fell sick and i ended up losing crucial time now it will be much more disturbing if I will have to make sudden move and look for rent or take permission from my office to look for hostel. It will be pretty chaotic. I feel from next semester In-person classes can be there in planned way and it will be bad idea to trouble people to
577	it is better to continue in online for this semester
578	It is not very safe now to start offline class, and m-tech students are not even provided with hostels now. So parents are concerned about staying outside the campus in this situation. We can't have online classes and offline exams because, online classes are not as effective as offline classes and we can't write offline exams for online classes. What i think is to continue online for this whole semester and have a new start for next semester. It is not very convenient to adjust in new place by 1
579	It is recommended to be continued in the same manner(classes and exam online) due to the challenge of relocation and shifting with family while the semester is in progress or before the Major exam. The
580	It is recommended to be continued in the same manner(classes and exam online) due to the challenge of relocation and shifting with family while the semester is in progress or before the Major exam. The
581	It is recommended to continue with the present system only till end of this semester. i.e. Classes and exams both online because itsstill difficult to travel in public transport and be in college for the entire day and follow all the guidelines, it puts an additional risk of getting affected by this recent variant of covid. When we have all the systems in place already successfully running for conducting everything
582	It is still unsafe to live off campus in Delhi. That too for female students. All offline activites should be
583	It is submitted to continue classes and evaluations for this sem online and start on boarding from May 2022. Otherwise administrative hassles involved in shifting (including family in my case) would adversely affect the focus of student .As present sem is partially done it is requested to start next sem
584	It is tough for out of station students to find accomodation for such a short duration and since most of the semester will be online exams should be online too
585	It is very tough time for us but due to online mode quality of education is not so good without interaction with teachers and student it is not possible to do so good in academics and lab experiments . As from my opinion classes and evaluation should be online as soon as possible
586	It should not be mandatory for the students in their last year. Most students have very few courses this semester and just 1 month is left before the completion of this final semester.
587	It will be good to resume from April. It will give us outstation students to look for accommodation.
588	It will be inconvenient to come for 15 days or just for major exam. It will be better to start the classes from 3rd sem. Also in last month because of omicron students which were present in campus had to
589	It will be very difficult to arrange everything in such a short time like packing and booking tickets. So it would be better if we are called for practicals only after majors
590	It will better if we don't switch mid sem to fully online to fully offline
591	It will not to be possible to come to campus in a short duration for just one month .Since the last month will be the busiest month for PG because we will be having projects, term paper, and we need to prepare ourselves for viva also in such a short span.It will take time to settle in a new place amid the semester And hostel will not be provided in such a short duration. And also we cannot rely on the
592	It would be better to me if offline classes and in person evaluation begins from next semester onwards. And if called for offline classes and in person evaluation, Institute must provide accommodation.
593	It would be better to start offline classes from the upcoming semester
594	It would be great to keep this semester online in terms of both teaching and evaluation and resume the in person evaluation and teaching from next semester.
595	It would be helpful to start from next sem..as it would be convenient for students staying far states
596	It would be more feasible if we could start this offline semester from next academic year. Doing things in between semester gonna be much more Messier and given following social distancing would not be able to follow as we all know given in the limited no. Of students there were many instances where we
597	It would not be convinient for many students like me to manage half sem offline given that we don't have any exp at iit-d previously (The First Year M-Techs), we don't know ways, we aren't aware of facilities, we aren't aware whether we can come by bicycles, we don't know which building is where and where will be our class. I think it's better to call students from summer as we can adapt ourselves
598	It's a kind request to continue this semester in online mode because it takes time to settle for those who would be living outside of the campus. And hardly a month will be left for this semester to

599	It's request to continue this semester online only. To avoid any unwanted hurdles during ongoing online class, students from different corner of the country has to manage to come campus which will create problem to manage the class and planning to shift hostel in short period of time.
600	It's too late. Onboarding for only 1 month doesn't make sense, only an added burden as we have to move to Delhi in middle of class teaching days. Better continue online as semester is almost
601	Its unconvinced to come to campus for offline classes just for 1-2 months for second sem, it will be better if online classes will start from 3rd sem because last months some students came to campus
602	Just for 1 month it's difficult to shift. So till this semester end let it be online then next academic year, freshly, new semester we can get on boarded.
603	Just start this on-person thing from next semester
604	Keep classes aa well as evaluation online bcoz student can suffer from Covid during majors. Assignment based can still be manged if in recovery.
605	Keep classes and evaluations online
606	Keep classes online, majors to be held offline
607	Keep everything including evaluations to be online for this semester
608	Keep everything Offline
609	Keep the entire semester online. Start regular classes with the new semester.
610	keep the semester and evaluations in online mode for this semester
611	Keep the whole semester in online mode including evaluations
612	Keep the whole semester in online mode including evaluations.
613	Keep the whole semester in online mode including evaluations.
614	Keep this entire semester online, since M.Tech. students aren't provided with hostel service it will take some time for arranging accommodation, while there will a constant pressure of assignments post
615	Keep this entire semester online, since M.Tech. students aren't provided with hostel service it will take some time for arranging accommodation, while there will a constant pressure of assignments post
616	Keep this entire semester online, since M.Tech. students aren't provided with hostel service it will take some time for arranging accommodation, while there will a constant pressure of assignments post
617	Keep this entire semester online, since M.Tech. students aren't provided with hostel service it will take some time for arranging accommodation, while there will a constant pressure of assignments post
618	Keep this sem online including evaluation, so study will not disturb. Start offline from next sem
619	Keep this semester completely online including major exam
620	Keep this semester completely online, from next sem keep it offline
621	Keep this semester offline both classes and evaluation
622	Keep this semester online
623	Keep this semester online
624	Keep this semester online only.
625	Keep this semester online since it would be very difficult to relocate to delhi in the middle of the semester. Regular classes can be helf from next semester.
626	Keep this semester online so that from the upcoming semester we can manage everything there
627	Keep this whole semester in online mode
628	Kindly allow us to continue this semester and evaluation in online mode only. Due to logistical reasons it leaves very short time to get accommodated with academics. It's helpful when onboarding is done before any semester starts. Hope our feedback would be considered. Regards.
629	Kindly consider carrying out this semester online till April 1. Many people have to shift to Delhi for the first time. It is difficult to shift in the middle of the semester from a long distance to Delhi while we have such a heavy coursework. Shifting to Delhi after the semester is over will be convenient for us.
630	Kindly consider keeping the major exams online as well. For us outstation students it will be really difficult to find proper accommodation and make arrangements in such short time. And as it is this semester will be over in 3-4 weeks, which is the amount of of time it would take us to make
631	Kindly continue only teaching as well as online evaluations (including Major) for this whole semester, please. Coming to Delhi only for few days will cost lot of time, money and most importantly energy. There will be long summer break after this semester, hence it won't make any sense to force students
632	Kindly keep Classes and Evaluation in ONLINE MODE for this Semester of 2022.
633	Kindly keep the audit options open even if offline classes proceed as many planned their semesters
634	Kindly keep the course audit policy same as online classes.
635	Kindly let the entire semester including but not limited to classes and evaluations online.

636	Kindly provide hostel to MTech students, otherwise it will take us lot of time to setup accommodation outside which can affect our studies and major exam preparation.
637	Lab work including in person behavioral experiments may be allowed from March
638	Less than 2 months are left for final semester. Since, hostel facility is not there for male CEC students, it will be very difficult to find accommodation for 2 months. Therefore, it is better to continue teaching
639	Let the semester continue in online mode.
640	Let the whole semester continue in the online mode including the major as transitioning in third month of a four months course will be very much hectic, as one need to shift delhi and also settle down. Also, the final months is all about much rigorous practice for the upcoming major and also for the summer internship, it will also put burden on us as for each subject one needs to prepare the term paper and also the presentation. So, it would be much easier and comfortable for us if the offline mode of
641	Let this be online (classes as well as evaluation)
642	Let this be online semester as last date of semester is April 1 only
643	Let this sem be online and next sem in-person
644	Let this semester (classes and evaluations) to be done online. Till the April 1, onboa4di
645	Let this semester be completed in online mode only and can start offline from start of next semester. Coming in between will adversely effect our studies and we M.Tech. students also have to search some place since we are not getting hostel so that will also effect our studies.
646	Let this semester be completely online including teaching and majors. Because most of us has not been in rhythm because of online classes. We should start complete offline from next semester.
647	Let this semester be in online mode as it shall be causing a lot of hustle bustle to shift in middle of the
648	Let this semester be online (both teaching and evaluation) and start offline classes from next semester
649	Let this semester be online as it would be difficult for someone to sort various things and make arrangements for the onboarding (especially when it is first time to campus). For those who already had onboarded for them exam can be in room (though online medium) under inperson invigilator. Switching to inperson class may affect the rythm and pace when it is only half of the semester left.
650	let this semester be online only. and resume classes in upcoming semesters
651	Let this semester be online, looking for accommodation will be a problem now in the middle of the semester and will take our time from the studies
652	Let this semester continue online. Since a month is left for teaching days. And then students can onboard during the summer vacations, to attend offline labs. That way, we'll have enough time to onboard, without disturbing our studies by wasting days to move, and then settle in, for hostel life.
653	Let this semester continue to be in full online mode.
654	Let this semester run online
655	Let us fun in these leftover days, So only online.
656	Link for omicron increasing warning : https://www.instagram.com/tv/CaEw17lj0XA/?utm_source=ig_web_button_share_sheet , calling for just 5-10 days is taking risk for omicron, my parents also telling me that college is taking the scary
657	M-tech project evaluation to be conducted online
658	major could be in online mode
659	Major is also online for this semester
660	Major should be online
661	Major to be held in online
662	majors must be online
663	majors should directly be held in person
664	Make the teaching hybrid. Those onboarded need to attend, others view them online. Keep the majors
665	Many of us are willing to have In-person classes and evaluations as well as soon as possible, But need audit policy as same as online semester, since we took courses in feel of that. Thank you
666	Many people have covid or atleast have suffered from it in the past. Chances of reinfection is very high. I myself have contracted Covid twice. Having flexibility of doing an online course in these times is what I think is the the best course of action. Or the classes can run in hybrid mode. Those who want to
667	March 14- hybrid mode of classes for this semester- online evaluations
668	March 18- March 20
669	March 20
670	March 20
671	March 20 - Continue teaching for this semester online, only evaluations(including Major) to be held in

672	march 20 - in person all classes and evaluation
673	March 20- Online mode
674	March 21 - everything offline
675	march 24-Continue teaching for this semester online, only evaluations(including Major) to be held in
676	March 7 is a good option, if majors will be held in person than starting offline classes is a good option. March 2 is very early for students who far from Delhi like me .
677	March 9
678	Maybe from next semester offline classes should start.
679	MBA Student. With no clarity if we would be provided hostel accommodation, I would prefer to continue this semester online. Next year to be offline
680	Mixing of online and offline is not good, this semester should be fully online mode. next semester start
681	More than Half of the semester is already done, courses are taught online, Taking offline majors or keeping offline classes in the middle If the semester will create problems for students. So it would be
682	Moving in between semester from online to offline mode will be time consuming. So I would like to continue online for the semester and start next semester in offline mode.
683	MSR students should also be provided with the hostel.we sometimes required to stay late in the labs then it becomes very difficult to go back to outside.
684	My opinion:Sir, I don't find any option to be appropriate. As if we choose for offline classes, many of us would need to arrange accommodation outside the campus as many have not applied for the hostels because things were assumed to be online throughout this semester. In that case the landlord will charge high rates for a month and there is risk of COVID as well. I also disagree with in person evaluation as if the classes will continue online many of us will choose to stay home and therefore it
685	My opinion:Sir, I don't find any option to be appropriate. As if we choose for offline classes, many of us would need to arrange accommodation outside the campus as many have not applied for the hostels because things were assumed to be online throughout this semester. In that case the landlord will charge high rates for a month and there is risk of COVID as well. I also disagree with in person evaluation as if the classes will continue online many of us will choose to stay home and therefore it
686	My opinions and wishes are no different than other students. Yes, I too want to spend my time in IIT D campus and do things in person from classes to lab works to chat sessions with friends....and especially so because I'm a Masters student who gets to do things in campus for just 2 years. However, these are some important issues that bothers me and am sure, if interrogated face to face, bothers almost the entire student community: In a tightly packed semester schedule with half the semester gone already, I would like the administration to consider the amount of stress it's going to add upon the students and ofcourse their family too, especially those coming from far away- we need to do necessary shopping, packing, do away with bank related formalities, health checkup,... that too at a time when the semester would be running at full speed and then to reach campus just 2 or 2.5 weeks before an in-person major examination and get accustomed at a different place and with different food habits just few weeks before an in-person exam would badly effect our mental state and ofcourse the examination. Moreover due to the pandemic we have lost several opportunities during past years. Nevertheless the level of competition in succeeding at any thing one undertakes has not come down for anyone be it the students applying for a doctoral degree or a student from science stream trying to learn new skills and prove himself worthy for the companies visiting campus during placement. I have expressed my views in enough details and am keeping a humble request to the administration to consider such matters and think if it would be helping students out to start things all of a sudden in the middle of the semester in a different way and then encroach the summer vacations in form of laboratory sessions, which really is the time for students to do internships (Academic ones offered mostly during May mid to June end I am a Master's Student and also a prospective PhD
687	NA
688	Neither classes nor evolution should be in person.
689	never
690	Next semester
691	next semester
692	Next Semester
693	Next semester
694	next semester

695	next semester be held in-person
696	Next semester can be held in person
697	Next semester only
698	Next semester shall start in person
699	next semester should be offline
700	next semester should be offline, considering campus can see upsurge in cases if all the students are
701	Next semester should be offline. Present sem should be online only.
702	Next semester will be in person
703	Next semester
704	next semester(as it will give students sufficient time to prepare for relocation)
705	No
706	No offline classes
707	No offline classes and offline exams
708	No offline classes or exams for this semester now.
709	No offline majors and classess. Only online.
710	No point in calling for 1 month as semester last class will be on 1 april
711	Normally, I do not have issue with resumption of in-person classes. However, the point is that I am in a semi refugee status in Iran after displacing from Afghanistan and my India visa has not been issued even after nearly 6 months. If I will not be granted a visa before March 14, resumption of in-person
712	Not onboard this sem.
713	Now let the online classes run, start the offline classes from the new semester
714	Off line classes to resume from next semester onwards.
715	offline and this semester should extend to one month more
716	offline class and online exam
717	Offline classes but online evaluations
718	Offline classes for practicals after majors of sem 2
719	Offline classes only when there are few COVID cases remaining and there is no danger of any other
720	Offline classes resume after major exam mid April. Otherwise it will effect preparation of major exam.
721	Offline classes should be started from next semester as it would create a lot of havoc in mid sem.
722	Offline evaluation from next semester
723	offline for masters only if hostels are provided, otherwise keep it online
724	Offline for this semester
725	Offline from next semester
726	Offline from next semester
727	offline majors
728	Offline mode from next semester onwards
729	Offline only if hostels are provided. As staying outside the campus in covid time is scary.
730	Offline routine may follow for next semester onwards.
731	Offline semester should be transitioned from next semester otherwise this semester will get hampered in adjusting to new environment which can be easily done in a fresh semester.
732	Ok with any option if hostel provided
733	okay with offline classes but please provide in campus accommodation
734	On 20 March or later ,subsequently all classes and evaluations to be held in person
735	On campus classes and labs should start from next semester. Few days are remaining in this semester
736	Onboarding and settling might take a bit of time , so even if we start to onboard . Evaluation to be done inperson should start from the lab semesters
737	onboarding of all the students would still have to be done due to exam and will take up a lot of time
738	Online
739	Online
740	Online class & online exam - there is no use of attending offline class for only 1 month left. Our batch
741	Online Class + Online Exam
742	Online class + online exam
743	Online Class + Online Exam
744	Online Class +Online Majors
745	Online class, online evaluation for this sem. Offline for practicals
746	Online classes + Online Evaluation (including Major)

747	Online Classes + Online Exam
748	online classes and evaluation for this sem as shifting in between the semester just gives a lot of stress and inconvenience. Keep it all offline from next sem.
749	online classes and evaluation in 2nd semester but offline classes from 3rd semester beginning
750	Online classes and evaluations for this semester
751	Online Classes and exams should be preferred for this semester because only month is left and for one month we will have to search for the accommodation as we are not getting the hostel.
752	Online classes and online assessments including majors to continue for this semester. Offline classes
753	Online classes and online evaluation
754	Online classes and online evaluation
755	Online classes and online evaluation
756	Online classes and online evaluation
757	ONLINE CLASSES AND ONLINE EVALUATION FOR MAJOR
758	online classes and online evaluation due to covid.
759	Online classes and online evaluation for this semester
760	Online classes and online evaluation is preferable for current semester. Because for CEC batch, Hostel accommodation is not available and only for 1 month shifting has to be done twice which may
761	Online classes and online evaluation police because most of us are not there in iit and its difficult to come back campus and settel and to resume for the very shor period approx 1and 1/2 month
762	online classes and online evaluation policy
763	Online classes and online evaluation policy should continue and also the audit policy should continue
764	Online classes and Online Evaluation. Because very few days will be left for last date of teaching. So this semester online teaching as it's going plus online evaluation.
765	Online classes and online evaluations
766	online classes and online evaluations for the entire semester.
767	Online classes and online evaluations(including major) and next semesters are also online
768	Online classes and online exam for this semester for offline we will have many problems
769	Online classes and online examinations since the MBA students have their internships right after it. We will need to shuft again and again with so much luggage. Some companies have put their
770	Online Classes and online exams for the current semester since classes are well-recorded and can seen again for better understanding. Also covid scenario is still uncertain.
771	Online classes and online exams for this semester
772	Online classes and online exams for this semester. On campus classes to be resumed from next
773	Online classes and online major exam should conducted. As i live outside delhi it is extremely difficult to me come in person to addend major exam only for few days.
774	Online classes are better for this semester. In case the semester is held offline, please provide hostel
775	Online Classes for this semester
776	Online classes for this semester
777	Online classes with Online exam. Regards
778	Online classes, online exams with same credit policy as last year should be continued till for this
779	Online evaluation and online class
780	Online Evaluation and Online Classes
781	Online evaluation and online classes
782	Online evaluation and online classes.
783	Online evaluation and online teaching should continue for the rest of the semester.
784	Online evaluations and classes
785	Online everything is going good
786	online exam, offline class; spice it up
787	Online exams with offline classes
788	online for teaching and evaluation for this semester.
789	Online format may kindly be continued for the rest of the semester
790	Online major
791	online medium
792	ONLINE MODE . Sir, It is recommended to continue this complete semester in online mode and resume offline for next semester so that students can relocate and establish administratively well .

793	Online mode till this semester end and Offline class from next semester because we are into the second half of this semester and it is not convenient for us to arrange accommodation outside the
794	Online mode, no hostel accommodation given to us and we are no idea about outside for us it's very tough to attending offline classes without Hostel
795	online only
796	Online only for this sem as Covid danger is still not over
797	Online only including all evaluations at least for this semester and same is requested for the 3rd year
798	Online practicals should happen in person
799	online sem
800	online semester and exams
801	Online semester have been time saver for a working professional doing part time Masters as travel time saved is more than 2 hours per day.
802	Online semester with online evaluations
803	Online semester with online evaluations [except required Labs for practical work which may be done in
804	Online semester with online majors. Resume offline from next semester
805	Online semester. Even if classes start from 14 March onwards in offline mode we will get only 15 days of classes in person. Finding accommodation for such short period outside campus will be infeasible for PG students and the rents will be changed even during summer break.
806	Online Teaching and Online Evaluation
807	Online teaching and Online evaluation for this semester
808	Online Teaching and Online Evaluation.
809	Online teaching with online major for this semester till April 1, 2022
810	Online this semester
811	online this semester and start offline from next semester
812	Online this semester including major
813	only 1 month left...accommodation problem...travel problem
814	Only a few topics are left and my home is in Bihar.so the entire semester online will be good for me, so keep this entire semester online.
815	Only If we students can get accommodation in hostel for us PG students if sem is offline. Moreover its halfway through a semester and it is better to start complete offline classes for each an every student
816	Only Major evaluations in person
817	Only Major evaluations to be conducted in-person. Classes, meetings, presentations should be
818	only major offline, everything else online
819	Only majors offline and all classes and evaluation before majors shall be held online. Arranging tickets at a short notice is very expensive and difficult for students living in distant states like Maharashtra and Telengana. I request you to atleast give one month to return to campus after the announcement of
820	Only offline major (to curb plagiarism). Everything until then should continue in online mode.
821	Only offline major should be take , classes should be online
822	Only one month will be there for proper online classes and then we again have a two month break. So I would suggest continue this semester online and resume offline classes from next semester
823	Only project is there so not in favour of online classes/evaluation
824	Only students required to attend classes and give exams should be called from next semester giving everyone appropriate time to make arrangements without disrupting current semester studies and schedule as relocating takes a lot of time and arrangements which would disrupt regular studies.
825	Or after this semester
826	Other: Classes and Evaluation to be conducted online for this Semester as well. From next sem,Classes - online/offline, Exams - offline
827	Other: Classes and Evaluation to be conducted online for this Semester as well. Switch to offline mode
828	Part time scholars may be allowed to attend classes and evaluations online for this semester as it would be difficult to renegotiate with the employers
829	Particular for we CEC Students, hostel accommodation has not yet been decided and hence not provided, so if in-person classes are starting from mid of march it is very tough to arrange for safe accommodation in this situation, even if major is in-person it is practically very infeasible to visit from West Bengal for few days and come back. This is my humble opinion to kindly let us carry on with full
830	Passing out Student is left with 20 day teaching period and will have to relocate hence the exam be

831	Permit part- time scholars to complete semester online including classes and evaluations as it would be difficult to re-negotiate travel and stay arrangements for few days of classes and evaluations with
832	Please complete this sem online and major evaluation should be online also.
833	Please complete this whole semester online, sudden travelling and change of locations makes it difficult for us to tune and prepare for end semester
834	Please conduct classes and evaluation online for this Semester. Switch to offline mode from next semester onwards. Relocation from homes to hostels for a few days only would be very tough for
835	Please conduct everything in online mode and only major in offline mode for this semester.
836	Please conduct the exam online too, to avoid any disruption in studies due to these activities.
837	Please conduct this entire sem and exams in online mode as there is shortage of hostel accomodation and its difficult to leave in pg being an south indian.
838	Please consider making this semester online including evaluation and conducting labs later. Also, please keep the audit policy same as last semester. This covid thing is bit of a stress for us. Means coming back there and then going back to home out of a sudden if it starts spreading rapidly. If such sort of thing happens in March or April again, our major evaluation will be compromised. Please do
839	Please consider making this semester online including evaluation and conducting labs later. Also, please keep the audit policy same as last semester. This covid thing is bit of a stress for us. Means coming back there and then going back to home out of a sudden if it starts spreading rapidly. If such sort of thing happens in March or April again, our major evaluation will be compromised. Please do
840	Please consider making this semester online including evaluation and please keep the audit policy
841	Please consider resuming offline classes from next semester as travelling and getting settled on campus in between a semester is not so easy for a student
842	Please continue both teaching and evaluations online for this semester, it would be better to start offline classes from next semester. In the mid of semestet, it would create hussle both for students and college administration for all the set up. If you don't provide hostel to M Tech students then it would be problematic to find room near college and also take time to settle. So it would be better if offline classes start from next semester rather than opening in between the semester. And please provide
843	Please continue classes and evalution in online atleast for this semester. As For Mtech students will not be given accommodation inside the campus it will be difficult for us find out it outside and also this process affects the major exams as well because adjusting with new ambience is not that easy
844	Please continue classes and exams in online mode for this semester. Getting hostel in campus at this time is highly competitive. Even though if offline classes will start in March, we will have barely one month to prepare for exams, and the last month will be laborious considering all the assignments and presentations. Time required to adjust for new environment might take some time, Just after reaching to campus in Mid March and staying in outside hostels will have a huge negative impact on our studies.
845	Please continue in online mode including major for current semester. 3rd Semester onwards full
846	Please continue online in same manner for this semester.
847	please continue online, its very hard for me to reside campus outside and settle down quickly, if not
848	Please continue teaching as well as all evaluations (including major) online for this semester. Covid is unpredictable . If while in campus or even in delhi, I got covid positive, then this would badly effect my studies and my performance in this semester. I don't want to take risk for this semester. I fell
849	Please continue teaching as well as evaluation for this semester online.
850	Please continue the Classes and Major ONLINE.As only a month of classes is remaining to complete the semester, It would be difficult for us to onboard to Delhi, and search for PGs for the remaining 45 days of our semester. And as the Mtech students are informed that we won't be provided with the hostel facilities, it becomes even more problematic for us to search for rooms outside the campus for a month or so. If the institute has no problem in providing us the hostel facilities, we are Ok with the offline classes. It is better if the offline classes begin from August 2022 ie., From next semester. As we
851	Please continue the teachings and evaluations for this semester in "online mode" only and if the covid situation does not worsen during the semester then start the off line proceedings from the next
852	Please continue the teachings and evaluations for this semester in "online mode" only and if the covid situation does not worsen during the semester then start the off line proceedings from the next
853	Please continue this semester fully online mode including lectures and major evaluations. I believe that it would be better to start a fresh semester fully offline mode from upcoming semester. The reason being that it would be difficult for people who visit the city and campus for the first time to settle nearby
854	Please continue this semester in online mode for classes and exams

855	Please continue this semester online
856	Please continue this semester online (teaching + evaluation). Since last year we let our guard down and Delta struck in end March-April (peaking in end April/May), to open it on 14th March with just less than 2 weeks for the semester to finish does not seem desirable. A little more patience would serve us
857	Please continue this semester online so that, chances of sudden covid outbreak reduce
858	Please continue this whole semester fully online for both classes & major evaluation. In person classes can be started from next summer semester. Due to resettlement and reallocation, our
859	Please continue this whole semester fully online for both classes & major evaluation. In person classes can be started from next summer semester. Cases are reducing because people are not going out much. A fresh semester with new rules should be beneficial for all.
860	Please continue this whole semester fully online for both classes & major evaluation. In person classes can be started from next summer semester. Cases are reducing because people are not going out much. And the number of death is increasing due to COVID. THAT SHOULD BE KEPT IN MIND before taking sny harsh decision. A fresh semester with new rules should be beneficial for all. DDMA hv to think about revenue of state but I believe IITD does not have that type of financial boundary! Again for course works IITD can start an option of choosing online classes if students want. I dont think a prof's credibility reduces in online classes. Bcoz new age requires to learn new technology & its an oppurtunity for all to learn it through online classes & online examinations. Its not a limitation.
861	Please continue this whole semester fully online for both classes & major evaluation. In person classes can be started from next summer semester. Cases are reducing because people are not going out much. And the number of death is increasing due to COVID. THAT SHOULD BE KEPT IN MIND before taking sny harsh decision. A fresh semester with new rules should be beneficial for all. DDMA hv to think about revenue of state but I believe IITD does not have that type of financial boundary! Again for course works IITD can start an option of choosing online classes if students want. I dont
862	Please continue this whole semester fully online for both classes & major evaluation. In person classes can be started from next summer semester. Cases are reducing because people are not going out much. And the number of death is increasing due to COVID. THAT SHOULD BE KEPT IN MIND before taking any harsh decision. A fresh semester with new rules should be beneficial for all. DDMA hv to think about revenue of state but I believe IITD does not have that type of financial boundary! Again for course works IITD can start an option of choosing online classes if students want. I dont think a prof's credibility reduces in online classes. Bcoz new age requires to learn new technology & its an oppurtunity for all to learn it through online classes & online examinations. Its not a limitation.
863	Please continue this whole semester fully online for both classes and evaluations(including major). In person classes can be started from next summer semester. Cases are reducing but the number of death is increasing due to COVID. THAT SHOULD BE KEPT IN MIND before taking any harsh decision. If offline classes will be commenced then the main problem is to find an appropriate
864	please dont open at all.
865	Please have this semester ONLINE itself as even to appear for in campus Major exams will need relocation off campus, as hostel is not available to all.
866	Please keep teaching and evaluation online only until hostels are allocated.
867	Please keep this semester online and begin offline classes and evaluation from the next semester as it is very difficult to shift and do all the arrangements in between the classes it'll hamper our studies
868	Please keep this semester online for everyone and start offline college after majors for sbi lab and
869	Please let this entire semester be ONLINE. This is a short semester, I and many haven't got hostel. Arranging everything will cost valuable time.
870	Please make evaluations also online so that everything falls in place with respect to teaching and
871	Please make the next semester offline because more than half of this semester has online now it doesn't really make sense to have offline now.
872	Please onboard after major
873	Please open college for in-person teaching and evaluation after this semester major
874	Please open the college after April for our labs because I think then the covid situation probably will
875	Please provide hostel or else online is best. Staying outside the campus risk now and renting for one
876	Please provide hostels to boys - MBA program. If hostels will be allotted to us then it will be very helpful, both financially and it is safe to stay in college campus. Personally i am comfortable in
877	Please resume offline as soon as possible i am fed-up of this unfair means people are using.
878	Please resume offline classes from next semester afresh. Keep this semester and evaluation online

879	Please resume offline mode from next semester. Travelling long distances (from South India to Delhi) mid-semester is very taxing and disruptive.
880	Please resume them as soon as possible
881	Please start from next semester.
882	Please start from the mid-March but allow the audit policy for this semester to be the same as the
883	Please start offline classes as early as possible. Atleast this should be done for onboarded students.
884	Please start online classes only if all students can be onboarded in hostel. Inside the hostel premises all necessary measurments can be taken but if hostel is not provided, its really risky. Kindly consider
885	Please start the offline classes as soon as possible .
886	Please start the offline classes as soon as possible. So that we can learn the thing properly
887	Please take the classes and Major exams online this semester as it will become chaotic for us to relocate and get settled in a new place in the middle of the semester. Let us complete this semester
888	Please think about conducting majors exam online as well, for out station students itd be very difficult to get accomodation for such a short duration.
889	Plz keep this semester only online
890	Post major allow us for practical Labs
891	Post major for lab semester
892	Post Major for our lab semester
893	Post majors for our lab semester
894	Prefer online mode
895	Proper offline to be started next semester onwards since already half the semester is over. There will be lot of hassle for most of the students to move during mid semesters. Also 1 April will be last working class. Hence recommended that next semester onwards it should be completely offline.This semester
896	Provide a hostel for subsequently all classes and evaluation to be held in person from march 2
897	Provide some relaxation deadline of final submission of thesis of Mtech final year preferably till june. In this online mode, I am finding it difficult to complete my thesis work. Please consider this also.
898	ready to board, if hostels are provided atleast on guest-basis. its difficult for us to find a boarding place in the mid of semester and it will take ample of time in doing it.
899	Regular activities next semester
900	Regular classes with pre covid teaching/semester schedule from next sem.
901	Relocating mid semester is difficult and is time taking activity especially with Family. With classes On, it will effect our studies. If offline semester starts from next semester, relocating will be easy during
902	Request to start in-perrson offline class and evaluation from next semester as I stay verry far from Delhi with family and kids academic school is about complete in april
903	Request you to continue with the online classes for this semester because from April 1st my Summer Internship would start, for which I have to go to Bangalore by April 1st. So just for 7-10 days in Delhi, I have to travel to and fro and arrange for my accommodation in Delhi which is difficult.
904	Requested that semester (both classes and evaluations) be continued in online mode as it is very difficult to relocate to Delhi with family and set up home here in the middle of semester when classes are under progress. Offline mode may be considered from next semester.
905	Requestimg starting of offline classes and evaluation from next semester onwards
906	Respected sir, coming from North-East, an early date like this would mean hight flight ticket prices. Hence I request that whenever the date is decided, we are given at least one month time. And I would
907	Respected Sir, I got admitted to the PhD programme in Spring 2021-22 and so I haven't been allocated to any accommodation or hostel yet. Sir, also since 1st April is the last date of classes of semester II, so I have merely 43 days left. Moving to a new place requires many preparations, adjustment to new environment and there are COVID protocols also which needs to be followed for travelling and it would be difficult to cope up with the regular classes of coursework along with vast syllabus in the mid of this semester. So, it would be kind of you if this semester is made online entirely , then I will be able to shift to institute once the Major exams are done. After the major exams are over,
908	Respected Sir, It will be good if current semester can be continued in online mode only as it will provide continuity to present semester. My personal opinion is that onboarding in between of semester can disturb the continuity in studies and will not be time efficient because of administrative hassles in settling down. Next semester can be started afresh in offline mode as students will get enough time to
909	Resume all activities offline except classes and exam for this semester.
910	Resume class online from next semester onwards.

911	Resume classes and exams from next semester onwards
912	Resume classes and exams online as shifting to Delhi for short duration will be difficult
913	Resume classes from the next semester. Hostel accommodation hasn't been guaranteed to mtech students. In view of the covid situation it will be difficult to arrange accommodation in such a short
914	Resume in person classes from 14 march but with option of attending online as well for helping students onboard at their own pace. Evaluations may be held in person.
915	resume in person teaching from next semester
916	Resuming off-line semester in the middle will not be good for us as due to hostel unavailability we will have to arrange our accommodation in Delhi and that may take significant amount of time .
917	Resumption of classes after major, as we have our lab semester
918	Resumption of in person classes from next semester
919	Resumption of in person should be done from next semester because only few days are left for this
920	Resumption of In-person can be done from next coming semester
921	Resumption of Offline classes and evaluation from next semester
922	Second semester completely online
923	Sem-1 2021-22 was my last semester which I have completed already. I have just one MTP presentation left which can be done online this month
924	semester 3 will be offline
925	Semester almost over, next semester should be offline.
926	Semester and evaluation should be in online mode.
927	Semester II, 2021-22, including evaluations, should be online. Offline mode can be resumed from next
928	Semester is going to end April first week, it would be better to continue classes and assessment both online for this sem. As searching for accommodation for such a short span will be difficult without prior
929	Semester should continue in online mode as well as the majors
930	semester should go online and ensure the full safety precautions . first ensure double dose vaccination of all the residents and all the students before onboarding. previously many other national level Government institutions have tried full on campus pre covid things. but failed badly. can IIT assure to all the students that there won't be any scenario like that and there money (for traveling and
931	Similar mode of semester as was for previous(Sem1, 2021-22) and offline from next semester. As even if one has to give majors in offline mode has to onboard for which one has to pay the hostel fees for whole semester additionally travel to Delhi for just a week or so which is not very much feasible for
932	Since classes would end at April 1, we can have online classes only wherein students can still onboard till March 14 and only have majors offline
933	Since Hostels are not being provided to Masters (M Tech) CEC Batch students - Just for few days it won't be practically feasible for us to come to Delhi for Offline Processes and search accommodation outside campus. So, Continue teaching for this semester online, also conduct evaluations(Major) online.
934	Since Hostels are not being provided to Masters CEC Batch students - Just for few days it won't be practically feasible for us to come to Delhi for Offline Processes and search accommodation outside campus. So, Continue teaching for this semester online, also conduct evaluations(Major) online.
935	Since Hostels are not being provided to Masters CEC Batch students - Just for few days it won't be practically feasible for us to come to Delhi for Offline Processes and search accommodation outside campus. So, Continue teaching for this semester online, also conduct evaluations(Major) online.
936	Since Hostels are not being provided to Masters CEC Batch students - Just for few days it won't be practically feasible for us to come to Delhi for Offline Processes and search accommodation outside campus. So, Continue teaching for this semester online, also conduct evaluations(Major) online.
937	Since Hostels are not being provided to Masters CEC Batch students - Just for few days it won't be practically feasible for us to come to Delhi for Offline Processes and search accommodation outside campus. So, Continue teaching for this semester online, also conduct evaluations(Major) online.
938	Since Hostels are not being provided to Masters CEC Batch students - Just for few days it won't be practically feasible for us to come to Delhi for Offline Processes and search accommodation outside campus. So, Continue teaching for this semester online, also conduct evaluations(Major) online.

939	Since Hostels are not being provided to Phd Batch students - Just for few days it won't be practically feasible for us to come to Delhi for Offline Processes and search accomodation outside campus. So,Continue teaching for this semester online, also conduct evaluations(Major) online. (Atleast for Phd Students). As of 1st yr students in PhD we're doing mainly literature survey which can be done from home. So let's not disrupt our routine as of now since only one month of semester is left. It is convenient for us to finish the major exam online and then make arrangements for going to the campus
940	Since I am a final year PG student and I have done all the classes till now in online mode without even a single in person interaction so In my opinion I think It should be continued in online mode both classes and evaluations as we are left with only two months till completion of our degree. So moving from one city to another only for 1 month and since we will be new admissions in hostel so have to pay the full hostel fees seems unfair. It will take many days again to settle in a new place and create a studious environment which will impact the performance in exams. Though we are waiting for this
941	Since I am new to institute, and about one month later I major is announced so shifting, travelling will more than a week which may affect my studies and results in coming major exam. Hence it will be very supportive of everything will start from a new semester. Otherwise it will be hectic for me.
942	Since I have only Mtech project this semester and only have a final project presentation left, any of the
943	Since more than half of the semester has already been completed, it does not make much sense in onboarding now. I believe that we should consider sticking with the online semester for this semester as it would give us more time to gauge the future of the COVID-19 and start afresh in the next semester
944	since online teaching has been ongoing for quite sometime now, most students would not have accomodation arranged or may not get hostel facilities. considering logistical challenges in the middle of ongoing semester, it may be advisable to begin offline classes and offline evaluations only from a
945	Since only 1.5 months are left for this semester,for me being a final year student(M.Sc. Mathematics 2nd year) it would really be convenient if this semester is fully conducted in online mode as coming to campus at this point of time for such a short duration will be infeasible from travelling and expenses
946	Since only 18 days of semester is left after March 14, it is not safe calling final year students who don't have any lab activities. As they have to come and again leave after 1 month. So, I suppose it is good to continue this semester online, while calling non-final year students back to IIT in next 2-3 weeks
947	Since only a month is left for the semester and going to delhi and finding room outside and to get settle quickly just a month before major is not easy ,can cause harm to major xam preparation and can disturb xam mind set.So atleast for Mtech students plzz let this semester complete in online mode only.
948	Since only one month is left to end of this semester... So I want online classes as well as online
949	Since the semester has already been decided and in between this short semester onboarding for many students is quite difficult. It's better to keep every classes and evaluations till majors as hybrid mode, giving students enough time to plan their onboarding accordingly and not missing out on
950	Since there isn't much time left with the semester. We are already half way done. I believe it would be better if the current semester runs with the flow in online mode. And the next semester is scheduled for offline teaching. The management would then get sufficient time to arrange and complete the hostel
951	Since we are almost at the end of the semester, considering this, there should be a choice based system like hybrid mode till this semester ends. Those who are in the home they should be allowed to give their online major exams. Post major, for our lab, from the next semester college should resume
952	Sir , I want online classes and online exam for this 2nd semester . Because I don't find any option to be appropriate. As if we choose for offline classes, many of us would need to arrange accommodation outside the campus as many have not applied for the hostels because things were assumed to be online throughout this semester. In that case the landlord will charge high rates for a month and there is risk of COVID as well. I also disagree with in person evaluation as if the classes will continue online many of us will choose to stay home and therefore it won't be possible for us to do
953	Sir I have joined in PhD programme in December and i don't have accommodation near institute and hostel inside campus. So, I am in favor of continuing classes and evaluation both in online mode.
954	Sir take online class also online exam for this semester
955	Sir, I don't find any option to be appropriate. As if we choose for offline classes, many of us would need to arrange accommodation outside the campus as many have not applied for the hostels because things were assumed to be online throughout this semester. In that case the landlord will charge high rates for a month and there is risk of COVID as well. I also disagree with in person evaluation as if the classes will continue online many of us will choose to stay home and therefore it
956	Sir, I think this whole semester is going on online is more better

957	Sir, it is requested that ongoing semester including evaluations to be continued in online mode since most part of this semester has been undertaken in online mode and only 1 month will be remaining thereafter. Further, next semester onwards in-person classes may be started as per the prevailing
958	Sir, Offline would be convenient only when hostel would be allotted for Mtech students. Otherwise Both classes and evaluation should be online, at least for this semester.
959	Sir, we don't want to go offline for this semester due to many reasons and next sem is better time reopen the classes in offline mode
960	Start classes offline as early as possible
961	Start from next sem
962	start from the next semester
963	start in person classes and evaluation from next semester
964	Start in person classes atleast by 20th March as it's very difficult to get get reservations in such a short time. So I request you to continue online till 20th March then everything in offline mode.
965	Start in person teaching and evaluations from next semester and If possible kindly allot accommodation (for next sem) to Ph. D. students at least.
966	Start in-person from next sem, it will be difficult to come from other part if country specially in between the classes. It will disturb the study. Better to start offline from next semester
967	Start it as soon as possible
968	start next semester with in person .continue this semester online.
969	Start offline classes around 18 to 20th march
970	Start offline classes as soon as possible
971	Start offline classes after providing hostel facility
972	Start physical in person (offline classes) from next semester onwards.
973	Starting from next semester, start in person classes. Due to covid 19 many people who have their parents jobless because of it may suffer great depression due to sudden arrangements for money for
974	Stay online for this semester including online evaluation
975	Student should be allowed to come and take class in person and appear in the exam in person but no compulsion should be made for all as it will take a lot of planning and changes and also parents are very much worried about sending their children back now , So each individual student's problem
976	Suddenly shifting to offline mode in such a short semester will be very difficult. It will take a considerable amount of time to change to hostel-way of life, which will be very hectic with our on-going busy schedule of assignment, quizzes and other evaluations. It would be better if done after the
977	summer break
978	Switching after the Major Exam i.e., for semester I/III to in person mode
979	Take every thing online and evaluate majors offline only. It will be difficult for maximum of the students to adjust in the offline mode only just for one month offline classes. We are in the habit of online mode for nearly two years so it will be difficult now to cooperate according to offline. Yes some of the students can manage but those are some. Majority can . If we have to start offline when we will start it very freshly with next sem and at that time everyone will make their mind and will for offline semester.i
980	Take only majors offline (in person) and make it compulsory for everyone.
981	Teaching & Evaluations should either be completely online or completely offline. A blended mode might decrease quality. So either both are in person or both should be offline.
982	Teaching and evaluation both should be online
983	Teaching and evaluation should be online for this semester
984	Teaching and evaluation to be held online for this semester
985	Teaching and evaluations online for this semester
986	Teaching and evaluations should be in online mode.
987	Teaching and evaluations should be online.
988	Teaching and eveluations for this semester to be held in online mode
989	teaching and examination both in online mode.
990	teaching as well as evaluation both online for the remaining semester
991	Teaching online and major online as no point in calling students from all over the country for a few exams and then them going back home.
992	Teaching semester online and evaluation online also.
993	Teaching to be held in person, only evaluations to be as per online semester.

994	Teachings and evaluations should continue online for this semester and if the covid situation does not worsen during the semester then offline classes could be started.
995	The number of covid cases is still quite at quite a significant level. In fact, the cases were much lower for a continuous period of time during sept-oct. If the institute took caution and (rightfully) did not open the institute then, why take the risk of opening now? There are many students coming to other Delhi colleges now who will inevitably (through careless conduct) again cause cases to increase. I thus request you to keep the classes online till April. Further, the majors should also be held online due to
996	The ongoing semester should held online only. The following semester should start with offline classes. However the hybrid mode of evaluation like PhD presentation or thesis presentation shouldn't
997	the present situation is not favorable enough for students who have not been allotted hostel accommodation, hence kindly continue this semester in online mode including major exams
998	The quiz that are held from time to time that should be in online mode only. That should not be taken off line as it happens quite often .
999	The Second semester's evaluation and classes should be held online.
1000	The semester should be continued in online(as being done right now). Post this semester we may resume offline. You never know for a new variant of COVID, let's not forget how last year summers was a disaster. Let's also not forget how everyone was asked to move out on 17th Jan this year, it hasn't been even 30 days of this happening. Let's plan and board students phase-wise just before re-start of next semester and see if everything goes okay, we may really move back offline. The
1001	The semester should be online including evaluations.
1002	The semester should continue online as it will finish by Mid April. Coming for a month or less from all parts of India and then settling down, Travelling with luggage, finding of Hostels and messing facility outside campus will hinder the learning part. More so it will also expose the students to have greater chances of exposing them to Covid whose recovery time is minimum 2-3 weeks. Hence , it is
1003	The students of MSc (first year) should be onboarded after majors in the month of April taking into consideration the financial conditions and other things going on at all of our houses.
1004	The students, those are from off-campus are not able to come back for majors or one month class. Because those are not in campus, they can not arrange out side just for one month. For those students, who are in final years and off-campus must be only mode for this semester as this semester
1005	The truncated nature of the present semester and the balance time left makes it extremely inconvenient for students to move specially those with families.The Hostels and the college itself requires 2-3 weeks to prepare for the onboarding facilities,which will leave even lesser time available to reach the campus from various parts of india,settle down administratively and prepare for the major exams.It is recommended that online Mode be continued atleast for this sem and offline mode can be
1006	There is no issue in offline classes and examinations. But please provide us with proper hostel accommodation inside the campus before calling us there for classes. (Mtech 1st year female student)
1007	There is no point for final year MBA students to come to college for 10 days. It will be expensive wagger for them. Rather, status quo should be maintained for final year MBA students
1008	There is no point in resuming this sem for a month. This sem should be in online mode. Subsequently next sem should be offline. The gap between this sem end and beginning of next sem may be utilised for onboarding of students. So that they are given adequate notice to come back and join the hostels.
1009	There's no point in calling students of last semester for in-person classes. We'll have only 2-3 weeks to attend physical classes since the present last semester ends by 10th April. Till the time we'll get accustomed to the physical classes, we'll be leaving. I just see no point in 2-3 weeks of physical
1010	There's no guarantee another variant wouldn't spring up.. maybe call us after summer break
1011	Think about the condition and take appropriate decisions...and this semester should be in offline or
1012	This complete II Semester should be in online mode including evaluation too. As I have been through this covid recently again and still facing health issues. Next summer semester should be in offline
1013	This complete semester to be held online including Major.
1014	This current sem should go online and major also
1015	This sem including evals stays online. Resume in-person from next sem
1016	This sem should be as usual in online mode.. But next sem should be offline with proper labs
1017	this semester (classes+evaluation) should be held online
1018	This semester (including teaching and evaluations) should be online as we have already completed half of this semester online. So, changes at this moment would be ambiguous for us.

1019	This semester and evaluation should continue to online. Online to offline transition will take too much time and there is very less time left in this semester. It would be better to online from next semester.
1020	This semester and major exam also on online mode as mtech students are not offered hostels so it will be difficult to find accomodation for few days in delhi.
1021	This semester can be concluded completely in online mode as we can see the changing pattern of Covid from April like last year. This will help students to get ample time to prepare to onboard.
1022	This semester can be conducted entirely in online mode including examinations. Transitioning or relocating during an ongoing semester is difficult and with very limited teaching days left, it would be
1023	This semester can be continued in online mode and New semester will be online mode so that people have enough time to adjust them
1024	This semester continue online completely.
1025	This semester continue teaching and Major exam in online mode.
1026	this semester evaluation to be held in online mode difficult to relocate in the middle of the semester
1027	This semester in my view should be in online mode only and next semester should be made offline viewing the covid situation and community transmission during that period.
1028	This semester in online mode including major.
1029	This semester is already very short. And only 4 weeks are left .I think this semester should be continued in online mode only. As hostel accomodation will itself 2-3 weeks .If this semester goes offline it will create so much of hussel and stress for us .so we request you to keep this semester in
1030	This semester is held on only online mode because it's my last semester and I am not come in campus only 1 month ,so please continue online this semester.
1031	This semester may be online and major may be held online only. In person classes and exam may be
1032	this semester online
1033	This semester online.
1034	This semester online. Offline from next semester.
1035	This semester should be as usual only necessary practical and things to be held in person in staggered way . Because we need to let the things be sustained. A hurry can cause a more dramatic
1036	This semester should be completed in online mode because after 1 month, classes will end and we all have to go home again. That will be very difficult
1037	This semester should be completed online
1038	This semester should be completely online including assesment so that there is enough time to
1039	This semester should be completely online including Major, next semester should be proper in-person. It will be difficult to switch at the end of the semester
1040	This semester should be conducted completely online. In person classes and exams should resume
1041	This semester should be conducted in online mode and also the audit policy should remain same as previous semester. It would be really difficult if any student gets COVID and has to stay in quarantine
1042	This semester should be continued in online mode only and evaluation should also be done online only as it would be difficult and expensive for us to arrange for on boarding and finding room near iit
1043	this semester should be fully in online mode as i am in last sem of my degree course so it would not be possible to come come to iit just when only 1 month is left...also i have not been allotted hostel so to
1044	This semester should be fully online as my family don't want me to go before holi and since after that there is only 2 weeks remaining in this semester in wich there is going to be lot of assignments and quizzes and it'll take atleast one full day to come from my home to campus .So I'd prefer that there is no compulsory onboarding of students as taking all classes offline don't seem practicla to me
1045	This semester should be fully online.
1046	this semester should be held in completely online mode.
1047	This semester should be online and from next semester everything offline
1048	This semester should be online completely.Next semester can be offline with staggere student onboarding 2-3weeks before the start of the semester
1049	this semester should be online if hostels can not be provided
1050	This semester should be online including major exams.
1051	this semester should be online. Offline semester should resume from next semester
1052	this semester should be remain online
1053	This semester should be totally online .
1054	This semester should continue online & all evaluations should be online. From next semester

1055	This semester should continue to be online and all the evaluation should also be online. As there were teaching online, it would take us time in online to offline transition.
1056	This semester teaching and evaluations to be held online. Since staggered onboarding will take 2-3 weeks, we will already be at the end of the semester by the time we have to move and settle into hostels. Especially for final year students, returning for just 1-2 weeks at best makes setting and academic and research activities more difficult. Moreover, since more than half of the semester has already been completed in online mode, it is better that the entire semester be completed online. People can comfortably move offline during vacations. Moreover in the case that any students are infected with covid, which may be significant, it will take a week to recover given complete vaccination.
1057	This semester to be in online mode. From next semester we can continue offline classes and
1058	This whole semester should be in online. Because it is Very difficult to relocate to Delhi in the middle of semester....can't do it while classes are going on.
1059	This will effect out study for the major . because we have only 15 days to shift to campus . So i request you to please continue physical class from summer semester .
1060	Till now hostel seat is not allotted to me, so how can I attend offline class and evaluation. So it's an humble request to you either allot hostel or Continue teaching for this semester online and all
1061	Try to Keep everything offline as soon as possible but the only concern is that the on campus accomodation due to COVID constraints and safety issues. If on campus accomodation is being provided then everything should be offline. But if there is no- on campus accomodation then keep
1062	Turning the semester offline for 2 weeks does not make any sense. Please consider starting everything offline from the next semester onward.
1063	Tushar Pant 2019ME10851 for CAIC GSEC
1064	Want completely offline from next semester
1065	Want second semester and major exams online
1066	We are in final year and preffer to keep the semester online, as for only one month there is no need of onboarding, It will be way good if the classes and svaluation both will continue regular after this
1067	We are not getting hostel in sem 2nd beacuse of non availability of space so I want that offline
1068	We are not staying in the hostel so it will be difficult to search search any of near institute and adjust there to study only in in 1-2 week . So I request you to continue this semester and evaluation(including major) in online mode and start the onboarding process in next semester for full offline mode
1069	we can continue online classes and evaluation for this semester. Next sem can be held offline
1070	We can resume classes offline but evaluation should be done online
1071	We have not been allotted hostels, hence, serching one in the middle of semester would be troublesome for us (CEC batch -2022) . Hence, requesting for online semester and online examination for this semester. Resumption of offline classes and online exams is requested to start
1072	We need offline classes as well as offline classes for all students
1073	we should continue teaching and evaluation this semester online
1074	We should plan for offline after this semester as shifting in between will be hectic and tough.
1075	We should take time for deciding any thing ...this semester should be online
1076	We want this sem online class and online evaluation ..my family is suffering from COVID-19 .we cant come for 5 paper pls understand..sir...for 5 day we have to take pg that is not affordable or not
1077	whats the point of offline classes now?
1078	Whole semester including majors should be online only. Since the students in iit are from all across the country so it will not be feasible from all of them to travel in these times. Also considering the chance that covid might strike back, then it won't be easy for all the students to migrate back their
1079	whole semester online and evaluation also online
1080	Whole semester online with concluding major
1081	Will prefer this semester online and person mode from next semester onwards
1082	would be willing to join before March 2 since last class day is April 1
1083	would prefer online exams
1084	Would still prefer Online mode

S.No.	Remarks in other option given by UG FY Students for UG First Year Courses
1	By February end. Also please postpone the major exams for 1 or 2 weeks, so that all UG 1st year students can onboard, and the exams can be conducted in offline mode for all the UG 1st year students.
2	From March 2, majors should be done in offline mode, if not please try to postpone majors by a week so that all can onboard. Too much cheating is happening in the online exams (because there is no screen sharing and only faces of students are visible). Please sir conduct majors Offline. Thank you
3	before Majors, as Majors should be shifted to prevent cheating and also this will give us more time to prepare
4	Majors should be kept offline for all the students and not just for those who are onboarded. The professors are already aware that cheating is bound to occur in Online exams, thus giving an unfair advantage to those not onboarded. So the authorities should try as much as possible to keep the majors offline for the majority of the students
5	Next day after majors. From 7th march.
6	From March 7 (after the majors)
7	AS SOON AS POSSIBLE. EVERYONE SHOULD HAVE OFFLINE MAJORS. THERE IS A LOT OF CHEATING HAPPENING.
8	After the Majors
9	April 4
10	8 March
11	Dear Sir/Mam right now am suffering with high fever and cold am not sure wheather it's a normal viral or something else so I would say if you can take some more time and start the on boarding from March 24 or a bit late because I don't want anyone else to suffer because of me and got infected because of me . Thankyou
12	from 15th march will be good
13	AROUND 10 MARCH
14	1st april
15	Please take offline majors for all...
16	Please try to start offline classes either from 24 March or a bit late as I will onboard a bit late due to this pandemic . My parents are saying to onboard after 25 March. Please consider this
17	
18	10 March
19	2 March Gang good ,24 March Gang cringe
20	As soon as possible
21	The main issue is of Majors, that would be so unfair for the onboarded students if they have to give exams offline.
22	1 April
23	in May
24	From second year onwards
25	April 3rd
26	8 march
27	
28	1st April should be the first working day of our 2nd semester in offline mode, so that we would have sufficient time after majors for onboarding and to settle ourself in that environment so far from our parents, cause it will be a little bit hard to leave our parents and settle there, kinda emotional attachment
29	6 march
30	from 10th of march
31	15th march
32	It is better to keep start from 2 nd semister because onboarded students need some rest
33	16 March
34	March 8

35	majors should be postponed and enough time should be given for entire batch to onboard.
36	Call everyone before majors for offline exams so that online cheating can be stopped
37	After majors, since I can't afford spending time in travelling and adjusting just before the examinations
38	7march
39	Currently I am out of station and it will be very difficult to arrange railway tickets so I would suggest to start classes from next semester only as I have my tickets booked for 12 March only
40	March 14
41	Since there are many tests and we have to submit multiple projects,viva,quizes,and also prepare fo majors we don't have time to travel and settle which will take 3-4 days of time to manage. I request to start offline by 2nd semester
42	Conduct classes online till 28 Feb but conduct Majors offline from March 2
43	In 2nd sem
44	after the end of 1st semester andbefore the start of 2nd semester
45	March 6
46	19 February
47	March 11
48	Good afternoon sir. I want that all the students gets equal and fair opportunity to change their department. And to ensure this either all the students have to give online exams or offline exam.
49	By starting from 7th March all the students are onboarded to campus . They are able yo take offline classes properly.
50	Postpone majors for some time and onboard us before it
51	Kindly start in person classes once the covid situation comes to negligible then only. We don't want to once go for in person classes and then suddenly return back if covid comes. Therefore start in person classes only when the COVID cases become negligible.🙏🙏 Health is the very most important factor in our life. Our parents are always worried for us and our health. Thanks.
52	After 7th March
53	July, after summer.
54	7 March
55	March 9 : shift the major exams and take offline exams
56	17
57	Majors should be offline and extended so that students get time to onboard or screensharing in online minors to prevent cheating
58	April 11
59	1 April 2022
